

The Challenge

Gigantic Detectors

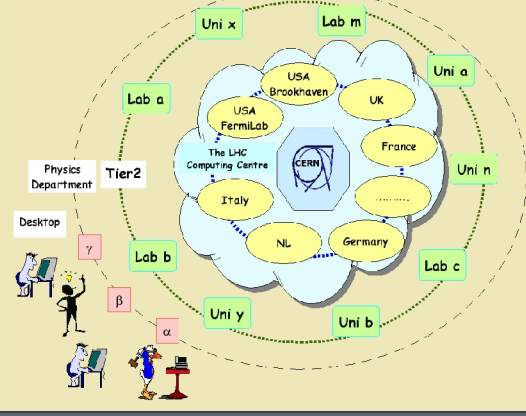

The CMS Detector

- Software distribution requirements:
- Relocatable packages
 - No root privileges necessary
 - Optional network download
 - Command-line installable
 - Saveable and reusable set-up
 - Included validation procedure
 - Concise configuration also for less experienced users
 - Multiplatform support
 - Multiple installations (old/new/pro)

Complex Software

Grid Computing

- A typical installation of CMS Software:
- 1 GCC compiler package
 - 1 SCRAM package
 - 40 CMS RPM packages
 - 30 LCG RPM packages
 - => 72 packages of 1 GB in total
 - Unpacked: 4 GB of disk space

- CMS Collaboration:
- 36 Countries
 - 160 Institutes
 - 2000 Scientists & Engineers
- CMS data taking:
- Event rate: 100 events/second
 - Event size: 1 MB
 - Events/year: 1 billion
 - Total raw data/year: 1,000,000 GB

A Solution: xcmsi

Configuration GUI

Provides complete CMS software environment for development and data analysis

The GUI consists of several windows:

- Current Configuration Settings:** Shows installed packages and their versions.
- Select software to install:** Allows selecting RPM tags and archives.
- Select Configuration File:** Chooses a configuration file.
- Change CMS Variables:** Modifies environment variables.
- Save Configuration File:** Saves the current configuration.

Workflow steps:

1. Choose software to install: - Tags: Select set(s) of RPMs resolving dependencies - Archives: Select single or multiple RPMs
2. Change configuration (if necessary)
3. Save configuration - Mandatory to transfer configured settings to command-line installer
4. Start, verify or update installation

Command-line Installation

```

GridKa compute nodes

CmsSwGridInstall.pl
-t rpm --site fzk.de
--install "ORCA_8_4_0 OSCAR_3_4_0"
  
```

Personal notebook

```

cmsi.pl
-f cmsset_default.csh
-d "ORCA_8_4_0 OSCAR_3_4_0"
  
```
