Overview of requirements for security and VOs coming from the AWG

V. Breton on behalf of AWG

Heidelberg 26/09/03

Session goals

- Present existing security tools
- Discuss security requirements from applications
- Discuss security activities till February
  - Prioritize developments beyond VOMS
- Format :
  - Update on EDG security (Akos)
  - Application views (Ingo, Julian, Johan)
  - Discussions

AWG contribution

- AWG has collected a list of use cases from the three application work packages
- Many of them address security issues, but security was not discussed as such by AWG
- Document available from edms : https://edms.cern.ch/document/386184/1
