Testbed Status overview

- Site
 - Enough site involved on EDG until the end of the project
 - Enough hardware resources
 - Enough people
- Services
 - All the services are (and will be) supported
- VO
 - All the EDG VO are supported by more than one site.

User Support Status

-Now

- By mail on Iteam list (large success)

 - No real history of the answer

 - A little bit chaotic but efficient and direct with the expert

- By the users support interface (poor usage)

 - To slow but structured (topics, key word,...)

 - Good for the users which discover EDG

- Plan until the end of the year

 - The both system will be supported.

Conclusion

The availability of resource will be enough until the end of the project to have a realistic and functional testbed of production.

The actual support structure should be enough until the end of this year
