Constrained Markovian MC for QCD initial state PDF evolution

First prototypes

S. Jadach

and

M. Skrzypek

`stanislaw.jadach@ifj.edu.pl`

HNINP-PAS, Cracow, Poland

The problem

- Markovian MC implementing the QCD evolution equations is basic ingredient of all QCD parton shower MCs

The problem

- Markovian MC implementing the QCD evolution equations is basic ingredient of all QCD parton shower MCs

- Unconstrained Markovian, with kernels being an essential input from QCD, can only be used for FSR (inefficient for ISR)

The problem

- Markovian MC implementing the QCD evolution equations is basic ingredient of all QCD parton shower MCs

- Unconstrained Markovian, with kernels being an essential input from QCD, can only be used for FSR (inefficient for ISR)

- A remedy is the "backward Markovian" of Sjostrand (Phys.Lett. 157B, 1985)

The problem

- Markovian MC implementing the QCD evolution equations is basic ingredient of all QCD parton shower MCs

- Unconstrained Markovian, with kernels being an essential input from QCD, can only be used for FSR (inefficient for ISR)

- A remedy is the "backward Markovian" of Sjostrand (Phys.Lett. 157B, 1985)

- However, backward Markovian does not solve QCD evolution eqs. It merely exploits their solutions which come from non-MC methods. Disadvantage?? Advantage??

The problem

- A remedy is the "backward Markovian" of Sjostrand (Phys.Lett. 157B, 1985)

- However, backward Markovian does not solve QCD evolution eqs. It merely exploits their solutions which come from non-MC methods. Disadvantage?? Advantage??

- **Is it possible to invent an efficient MC algorithm for constrained Markovian providing *own* MC solutions for QCD evolution eqs?**

The solution

- We claim that we have found a class of solutions of the above long-standing problem

The solution

- We claim that we have found a class of solutions of the above long-standing problem

- In the introductory exercise Markovian MC `EvolMC` was found to agree with `QCDnum16` to within 0.2%,

  see Acta Phys.Polon. B35 (2004)745

The solution

- We claim that we have found a class of solutions of the above long-standing problem

- In the introductory exercise Markovian MC `EvolMC` was found to agree with `QCDnum16` to within 0.2%, see Acta Phys.Polon. B35 (2004)745

- Recently we have constructed the 1-st prototype of the efficient *constrained Markovian MC* (solution IIB). It agrees with `EvolMC` to within 0.2%
