

# LCWS 2004

## Tuesday, 20 April 2004

### Tracking and vertexing: Silicon R&D I (13:30 - 15:00)

time	[id] title	presenter
13:30	[16] Status of CCD-based vertex detector R&D for a linear collider	, Aso, T.
13:45	[17] LCFI Collaboration Status Report	, Joel Goldstein
14:00	[18] Status Report on the MAPS Detectors for the Warm and the Superconductor Options of the FLC	, Grzegorz Deptuch
14:20	[19] Status and first results of the UK active pixel collaboration	, Jaap Velthuis
14:35	[20] Design and Technology of DEPFET Active Pixel Sensors for Future e+e- Linear Collider Experiments	, Gerhard Lutz
