

Enabling Grids for  
E-science in Europe

[www.eu-egee.org](http://www.eu-egee.org)

*June 18, 2004*

# Project Technical Forum

C. Loomis (LAL-Orsay)

All-Activity Meeting (CERN)

EGEE is a project funded by the European Union under contract IST-2003-508833

# Contents

- PTF Mandate

- Issues

# PTF Mandate

- Requirements
  - collect, manage, prioritize
- Service APIs
  - control changes
  - promote common solutions
- External Collaboration
  - other grid projects
  - standards bodies
- *Merge requirements* and use cases from the application, security, and operations groups.
- *Manage the evolution* of the requirements and use cases.
- *Prioritize the requirements* and verify if (and how) the defined use cases are satisfied by the EGEE architectural design.
- Review the grid *service specifications* and *control changes* to those specifications and external interfaces.
- See and *promote common solutions* where commonalities exist in the middleware or application domains.
- *Promote convergence* with other grid projects by incorporating requirements from external projects using (or hoping to use) EGEE software by discussing the EGEE design with other projects.

# PTF Members

- **NA4**
  - C. Loomis
  - M. Lamanna (HEP)
  - J. Templon (HEP)
  - J. Montagnat (Bio)
  - C. Blanchet (Bio)
  - R. Barbera (Generic)
  - G. Andronico (Generic)
  - E. Fede (Testing)
- **SA1**
  - M. Schulz
  - A. Ferraro
- **SA2**
  - A. Sevasti
- **JRA1**
  - E. Laure/F. Hemmer
  - P. Kunszt
  - F. Pacini
  - A. Dajoui
  - A. di Meglio/L. Guy
- **JRA3**
  - D. Groep
  - O. Mulmo
- **JRA4**
  - J. Orellana
- **Industry Forum**
  - B. Carpenter

# First Meeting

- Mailing List
  - Open registration; must be member to post.
  - [project-egee-ptf@cern.ch](mailto:project-egee-ptf@cern.ch)
- Agenda
  - <http://agenda.cern.ch/fullAgenda.php?ida=a042424>
- Mandate (B. Jones, C. Loomis)
- Requirements (All Activities)
- Services (Middleware, Security, Network Services)

# Issues

- **Document Review**
  - Architecture Document
  - Operations Document
  - Common Application Layer
- **Requirements Management**
- **Service API Definition & Management**
- **External Relations**
  - other grid projects
  - standards bodies
