# Security Requirements

JRA3

**Which/types of requirements  
from your domain will likely  
be the most urgent in the  
coming year?**

- Site security top-10 list
- All the application requirements
  - Possible and impossible...

# Are there any major missing/tacit requirements or unrepresented areas in existing documents?

- Many requirements are poorly stated
  - Impossible to test
  - Many issues baked into a single item
  - Targets the effects, not the causes
- Platform needs
- PERFORMANCE METRICS

# EGEE documents and deadlines containing your domain's requirements

- Practically every single document has a requirement on security...
  - NA4: HEPCAL, Biomed
  - JRA3: User requirements survey, MJRA3.1 (PM3)
  - JRA1: Middleware functionality requirements
  - JRA3: Site Security Group requirements
