

Title: ROOT

Lecturer: Dr BRUN, R

Date and Times: 21st July at 14:00

Summary of the proposed talk

The talk will be a rapid introduction to the ROOT data analysis and visualization system, including a demonstration.

Prerequisite knowledge and references

The ROOT web site is available at <http://root.cern.ch>

Students are strongly recommended to download the binary files from this web site. The documentation is also available

Dr. Rene Brun

He is a physicist and he has been a CERN staff since 16 July 1973.

During these years, he has collaborated with several experiments (currently in ALICE) and has created and developed several software systems like the detector simulation package GEANT3, the data analysis system PAW and the ROOT framework.
