

# 10th Workshop on Electronics for LHC and future Experiments, Boston USA

## Tuesday, 14 September 2004

### Parallel session B3 (16:10 - 18:00)

time	[id] title	presenter
16:10	[92] The final design of the ATLAS Trigger/DAQ Read-Out-Buffer Input (ROBIN)	MATTIAS MUELLER
16:35	[93] Integration study and first test results of the CMS Muon Barrel Alignment system	DEZCO NOVAK
17:00	[94] Very high dynamic range and high sampling rate VME digitizing boards for physics experiments	DOMINIQUE BRETON
17:25	[95] The ALICE Data-Acquisition Read-out Receiver Card	CSABA SOOS
