

Enabling Grids for E-science

Concluding remarks

Fabrizio Gagliardi, Project Director, CERN

EGEE 1st EU Review

9-11/02/2005

www.eu-egee.org

- **The review was as always a very useful exercise:**
 - Excellent occasion also for the partners to get in-depth understanding of all activities
 - Positive interaction with the review team sparked new ideas
 - The preparation for the review and demos has strengthened the team spirit in the project

How to reduce the administrative/reporting load and manage 2 reviews, spinning-off other projects, negotiating the next project phase, etc.?

Could the next period be extended to a 15 month period?

- **EGEE was proposed as the first phase of a 4 year programme**
- **Essential to obtain the second phase of EGEE to continue with the present programme and profit from the experience learnt in the first phase**
- **The input from this review will also be used to improve the programme of work for the next proposal:**
 - Consolidate the infrastructure, enhance the “virtuous cycle”, and establish a basis of trust for current and future users; among other possible improvements

- **Take up the role of a possible “incubator” for users (and industry), clearly stating the possibilities of grid usage, but also possible limitations**
- **Plan a long term sustainable programme and agree this with EGEE national and EU funding agencies**
- **Important to receive early feedback and guidance from the funding agencies to avoid gaps and maintain the available resources, as well as the present drive**
