

# Conclusions/Issues/Actions

- Major update of document.
  - Terminology
  - Make the planning explicit
  - Technical update
- Can we identify which T1's will connect with which model?
  - Drill down more in the architecture and give specific examples.
  - Resolve outstanding IP recommendations
  - Default route
  - Security model and implications
- Can we identify the explicit backup paths. (GEANT provisioning, US, Asia)?
  - Recommendations? Policy?
- What can we say about the physical infrastructure at T1's and T0?
  - Recommendations?
- What about the operations model (and monitoring)?
  - Overall model?

## Conclusions/Planning

- V2 of the document by end of May.
- Schedule the next full meeting for end June.
- Work via mailing list and no longer the restricted group but the full group.
- Conference call every (2) weeks.
