Enabling Grids for E-sciencE

- **MJRA4.4/5**
- **MJRA4.7**
- **DJRA4.4**
- **Work in Q1 2006**

Enabling Grids for E-sciencE

- **For June we MUST have:**
  - An updated version of the BAR-NSAP and BAR-Client interfaces, with any necessary additions
    - If nothing else comes up, this should be the final implementation.
  - A client of some sort
  - The security scheme implemented
  - Installers, docs etc and compliance to gLite repository rules
  - A deployed NSAP at GARR

- **For June we MAY have:**
  - Deployment at another site

- **For June we WILL NOT have:**
  - A working NSAP, because GN2 cannot provide it until Oct-Nov

eGee
Enabling Grids for E-sciencE

- **For September we MUST have:**
  - Feedback to the JRA1 (Agreement) proposed architecture
  - A LNSAP (at GARR?)
    - GRS without router configuration is an option

- **For September we SHOULD have:**
    - QueryService

- **For September we MAY have:**
  - Architecture document compliant with JRA1
    - If we conclude that it's worth it
  - Compliance with JRA1 Architecture
    - Could be partial, could be full

- **Why do we care about JRA1's architecture?**
  - Because the EC reviewers are keen on co-allocation
  - Because Tiziana has done enough to at least deserve feedback

Enabling Grids for E-sciencE

- **This was billed as a bug-fix release.**

- **If the GN2 timescales work, we can try to incorporate the NSAP.**

- **We could start/continue the Agreement alignment**

- **Bug fixes.**

Enabling Grids for E-sciencE

- **NSAP should be ready by then**

- **More bug-fixes**

- **Report on BAR**
