

International ICFA workshop on HEP
Networking, Grids, Digital Divide and Global e-
Science Daegu, Korea

May 23~27, 2005

HEP as e-Science

Kihyeon Cho

**Center for High Energy Physics
Kyungpook National University**

Why HEP e-Science?

- LHC @ CERN

- LHC Data: 12~14 PetaByte/year
- LHC CPUs: Peta Operations of CPU

- ⇒
1. e-Science based on Grid concept
 2. Tier0, 1, 2, Regional Data Center

Korean Group is working on CMS

CMS Collaboration

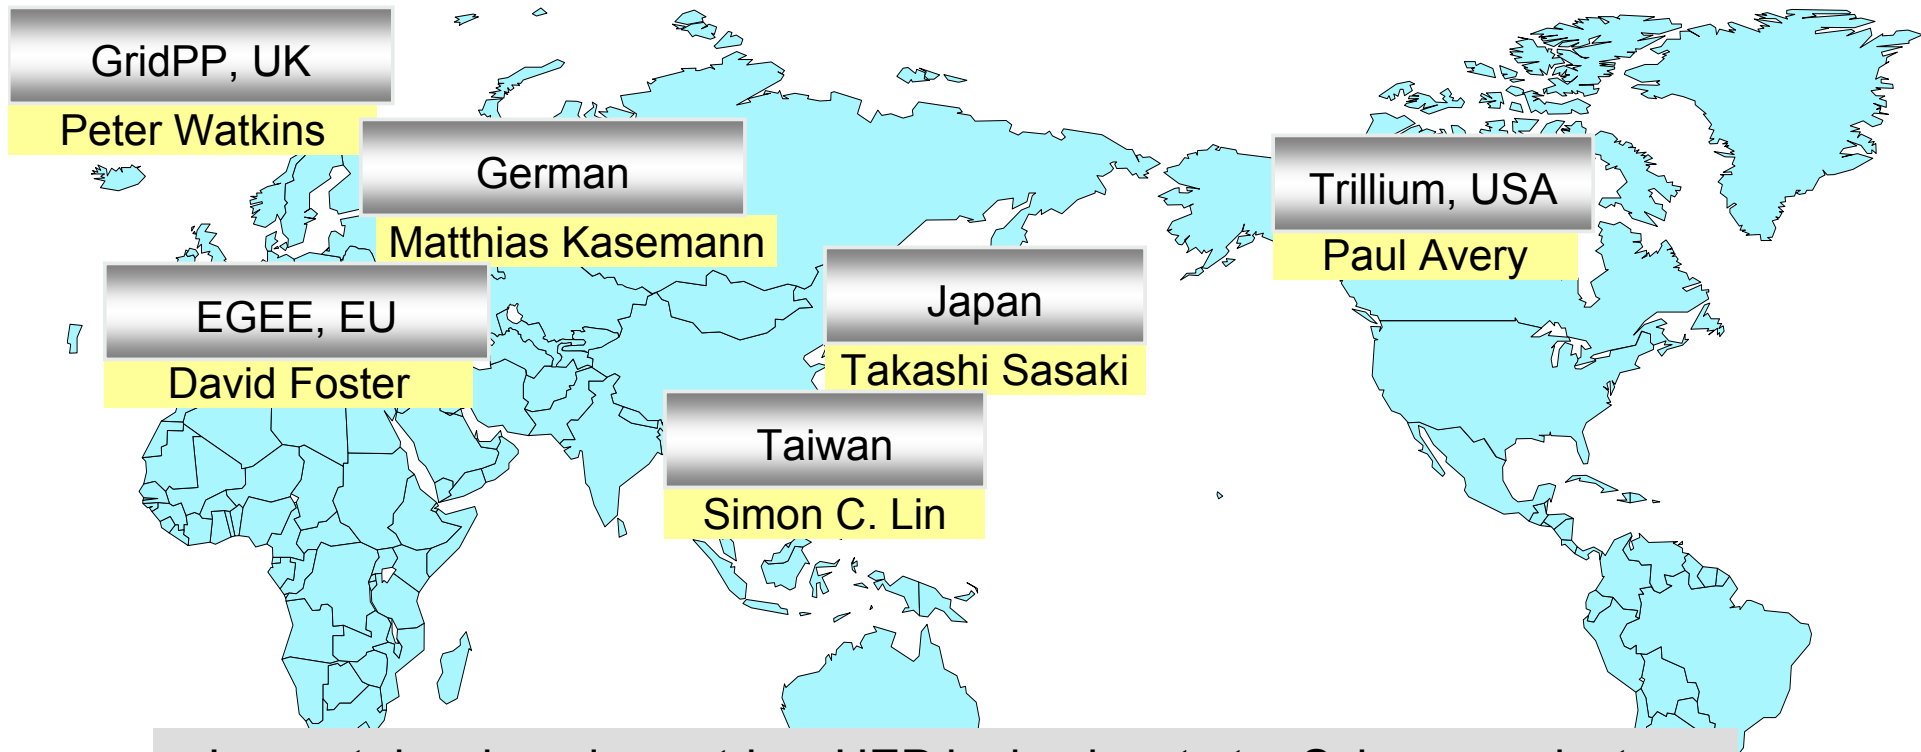

HEP e-Science efforts

HEP e-Science project around world

- In most developed countries, HEP is dominant at e-Science project.
- However, in Korea, this year's e-Science project does not include HEP.

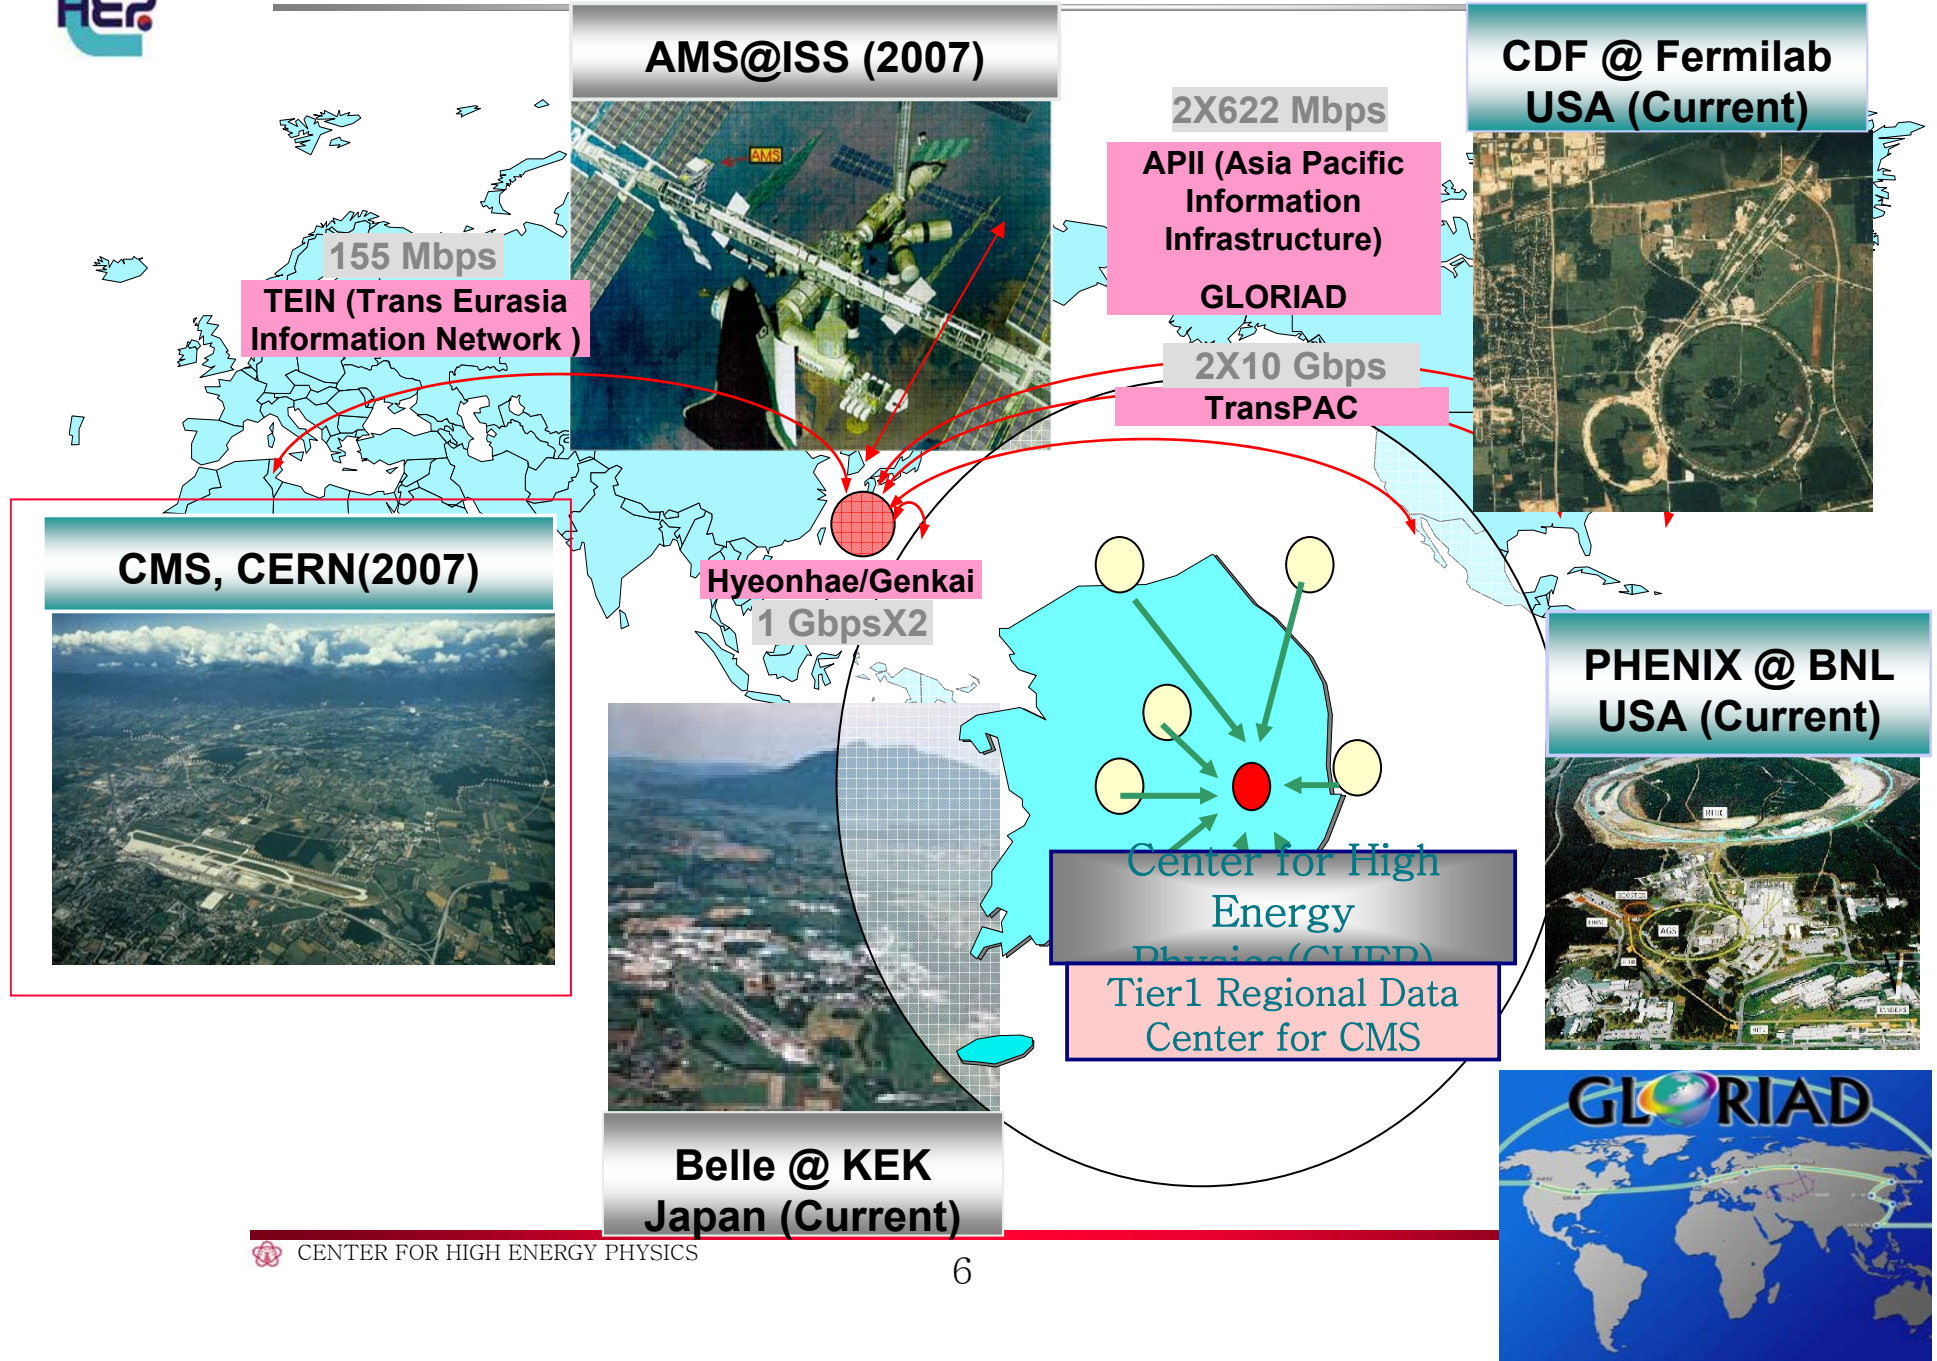

=> "e-Science in Korea" by Dr. Jysoo Lee

Still going...

In Korea

Energizer Bunny®

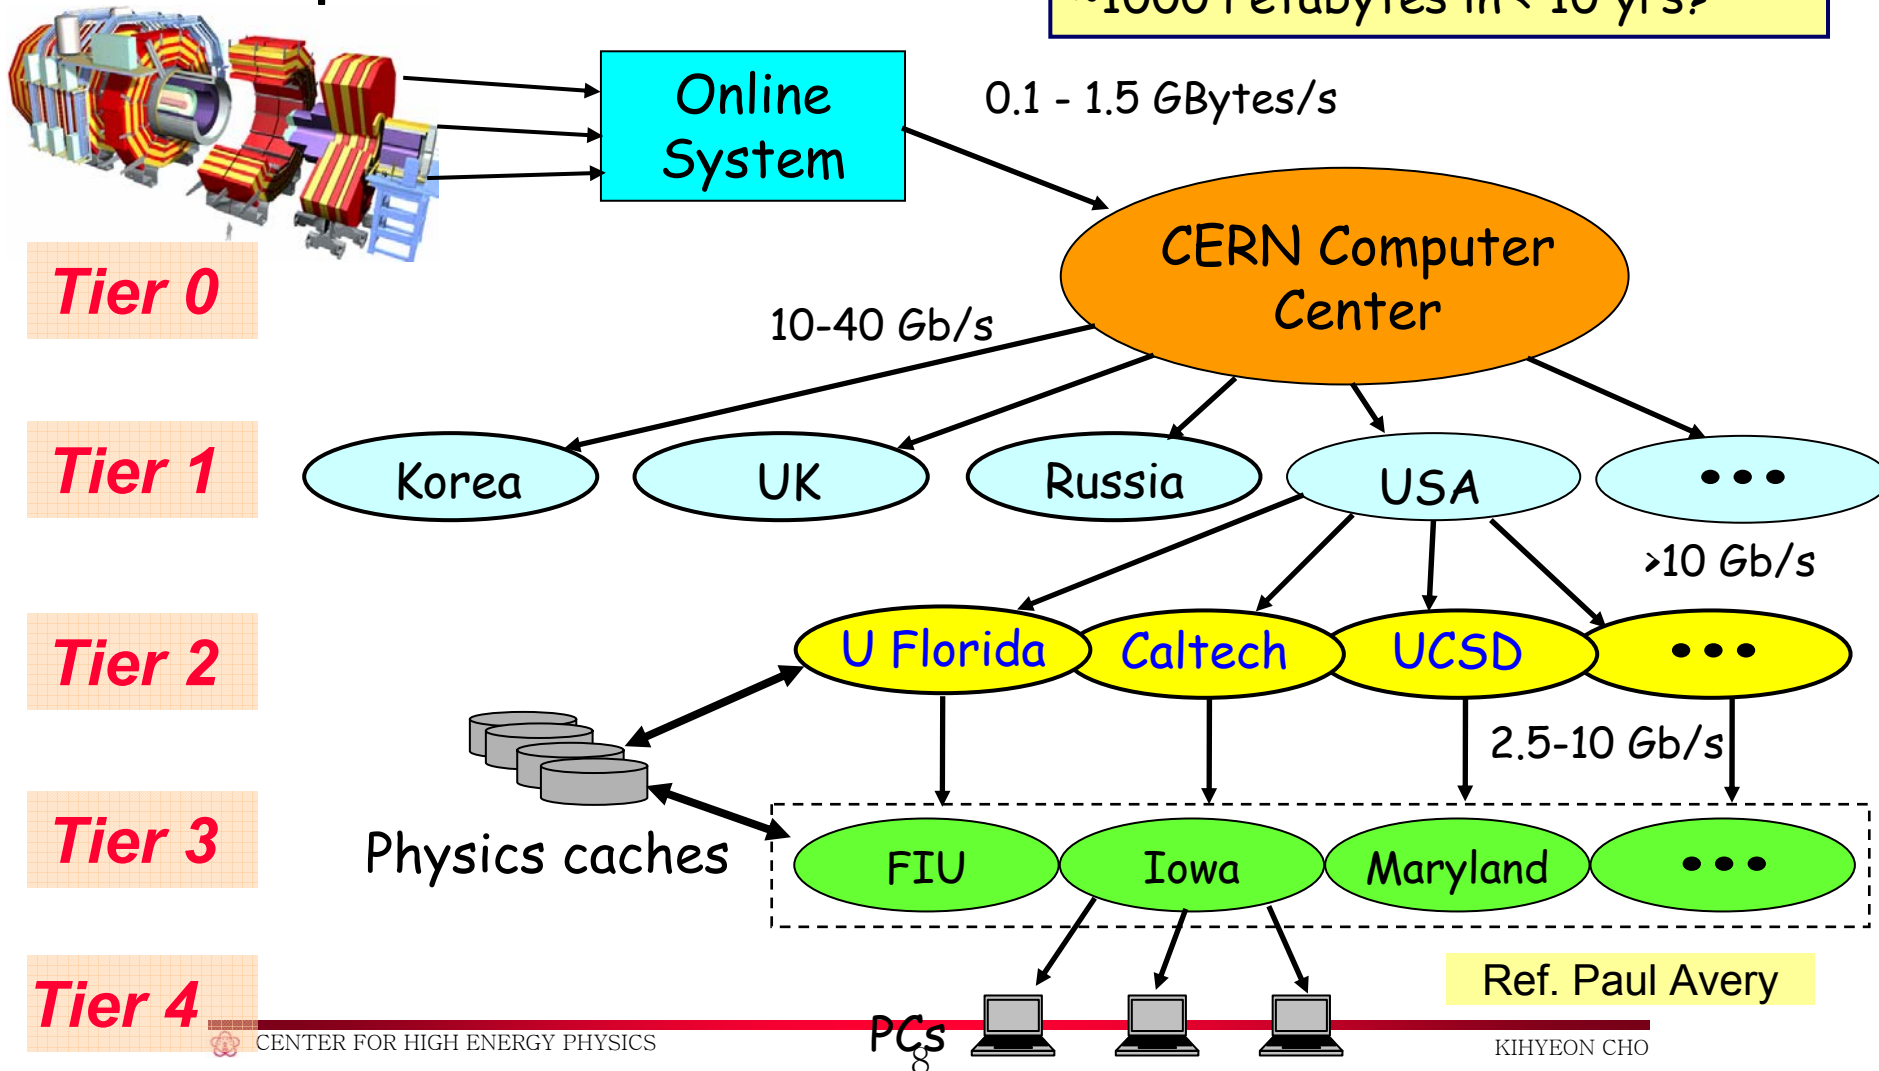

HEP e-Science in Korea

- Goal
 - Tier1 Regional Data Center for CMS
 - HEP e-Science Service Frame
- e-Science R & D
 1. Network – Bandwidth Challenge
 2. Storage – SRB Federation
 3. Computing – Data Grid Technology

HER Goal - Tier1 Regional Data Grid

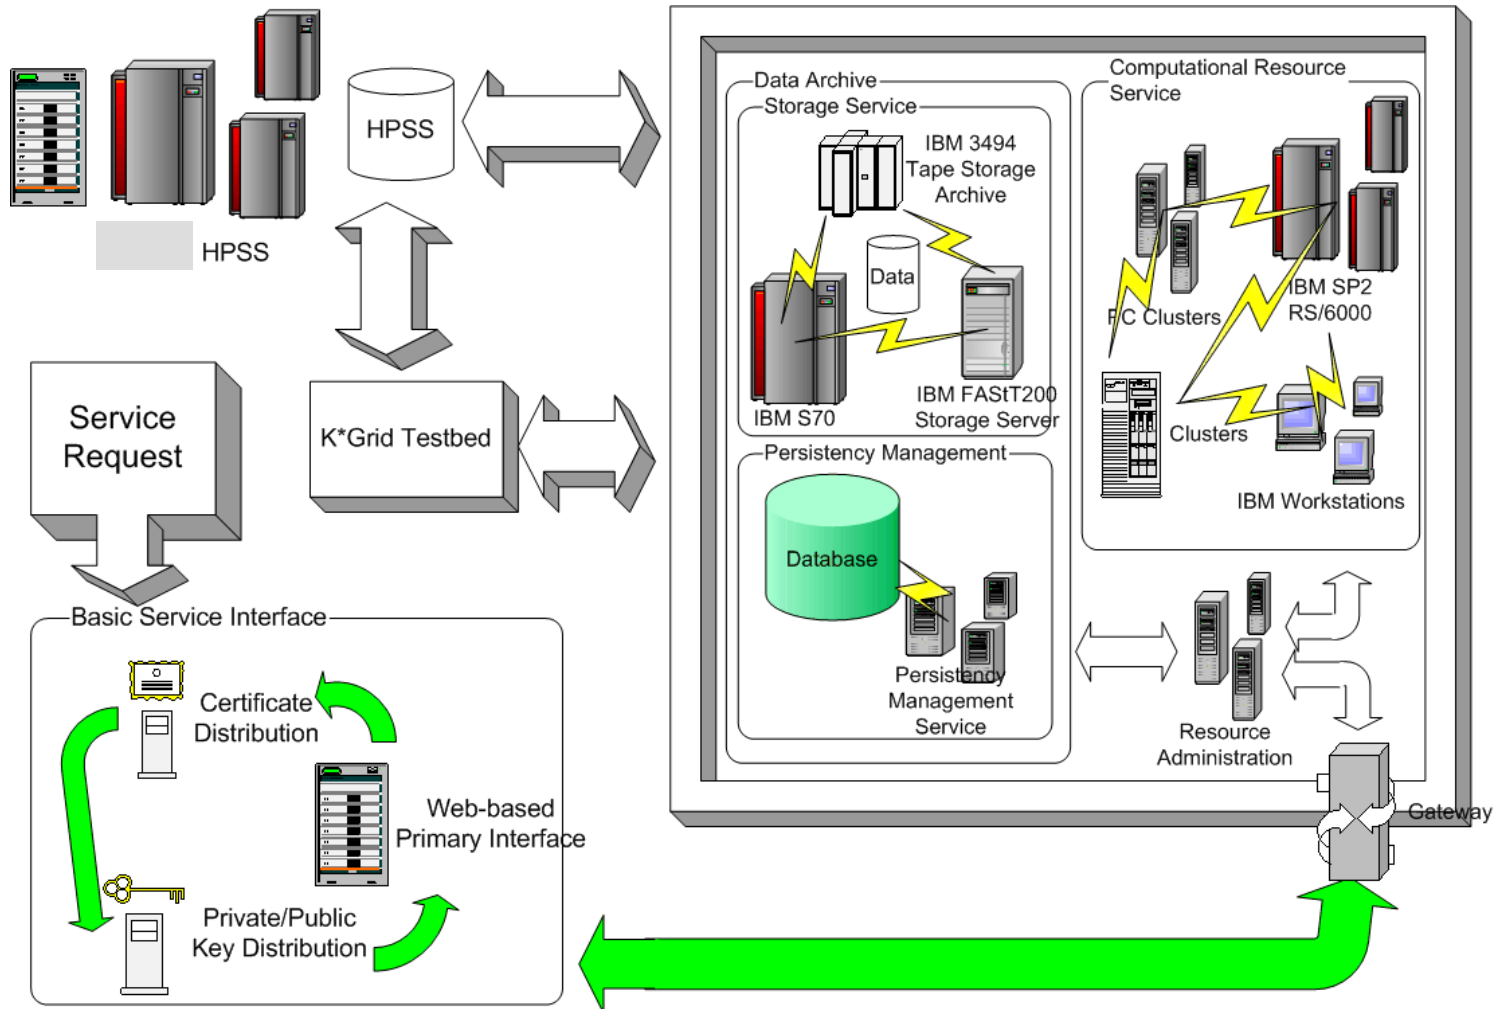

~10s of Petabytes/yr by 2007-8
 ~1000 Petabytes in < 10 yrs?

CMS Experiment

HEP e-Science Service Frame

HEP e-Science Service Elements

- Web Portal
- Security
- Application Layer
- ARDA
- Grid Service based on LCG2 & Grid3
- Data storage using SRM & SRB

e-Science R & D

- **Regional Data Center in Korea is located at Supercomputing Center of CHEP(Center for High Energy Physics) @ KNU (Kyungpook National University)**

Current Resources @ KNU

- 45 TB Tape Library
- 10 TB Raid Disk
- ~200 CPUs of Linux clusters
- Network: 6 Gbps
- Space and power for Tier1 Data Center
- Two full time computer researchers & one post-doc

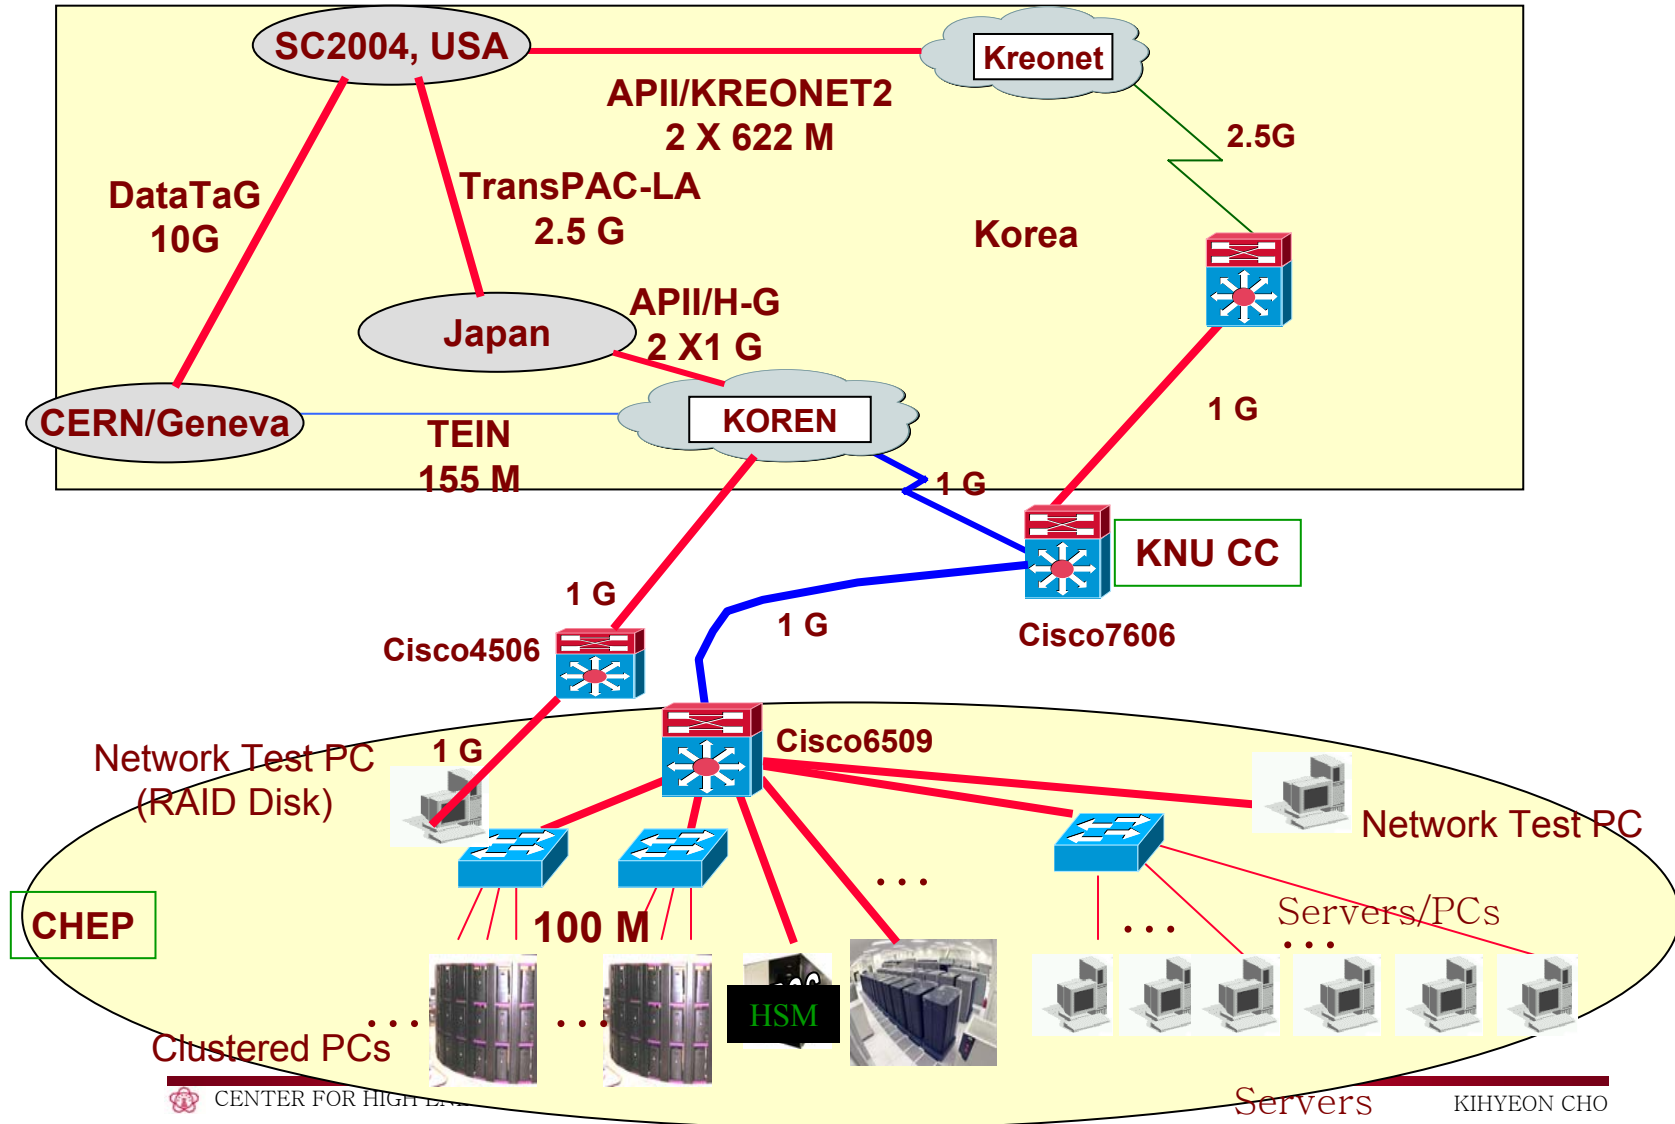

1. Network

- High Speed TeraByte Transfer for Physics
 - New Network Performance Records (101.13 Gbps) to and from Pittsburgh, USA @ SC2004
⇒ World Breaking Record
 - Participants: Caltech, SLAC, Fermilab, CERN, Florida, UK, Brazil and KNU/KISTI
⇒ 4 Continents

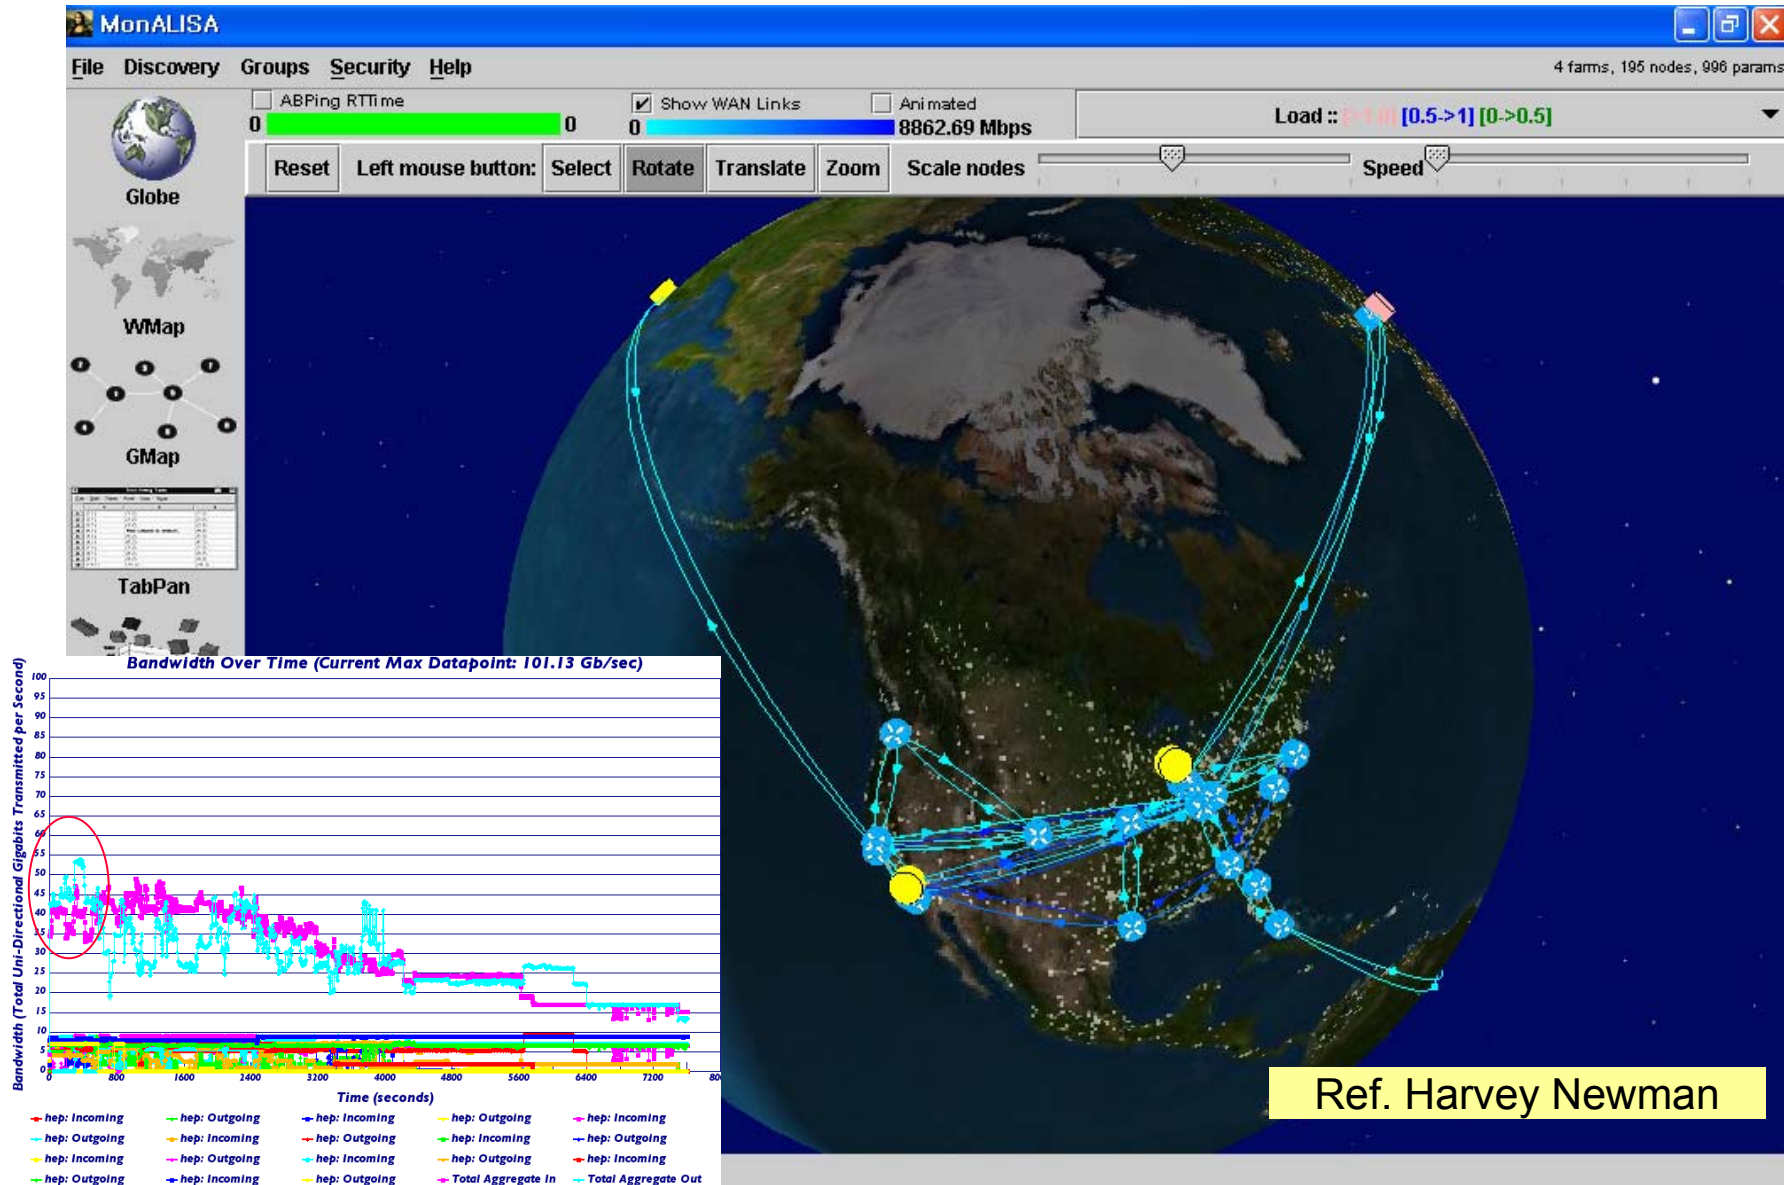

Network Path during SC2004

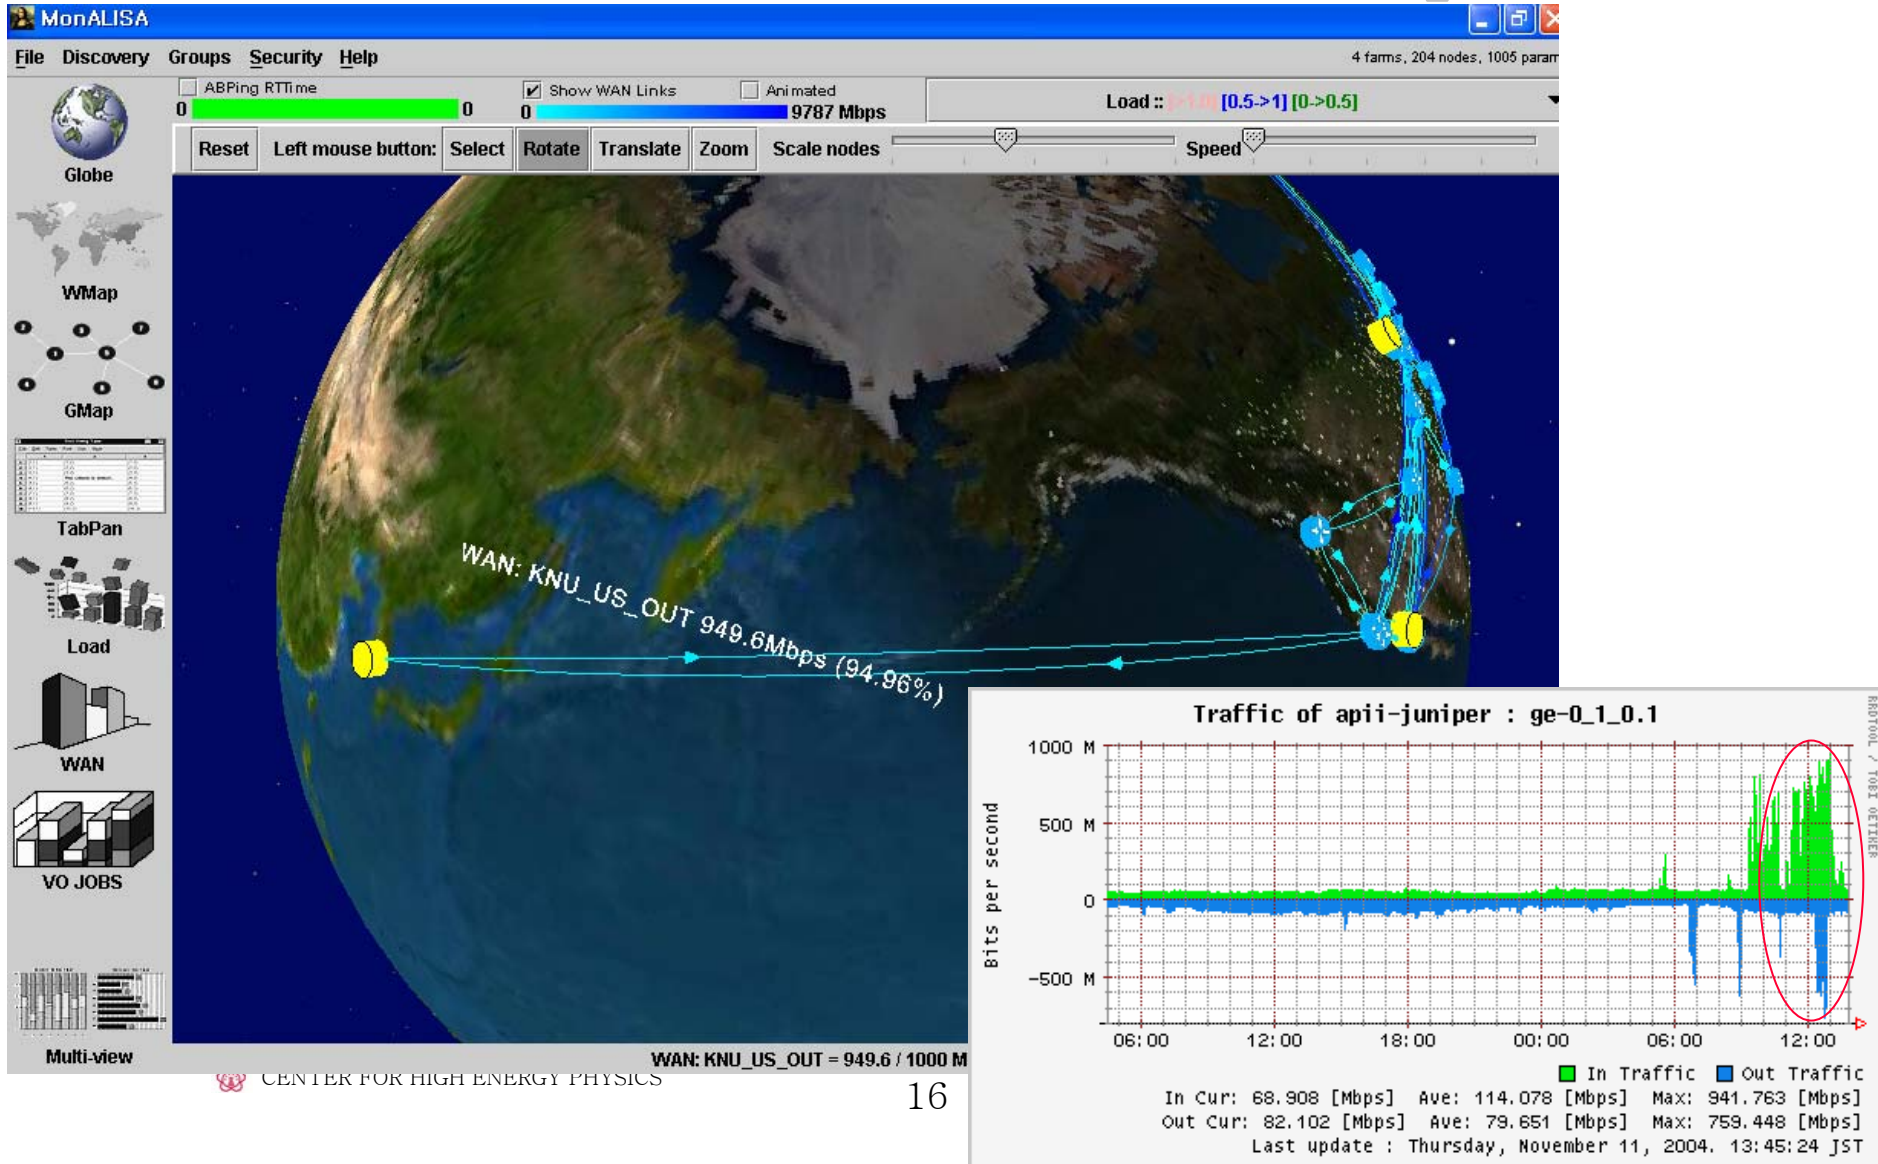

World Record (101.13Gbps)

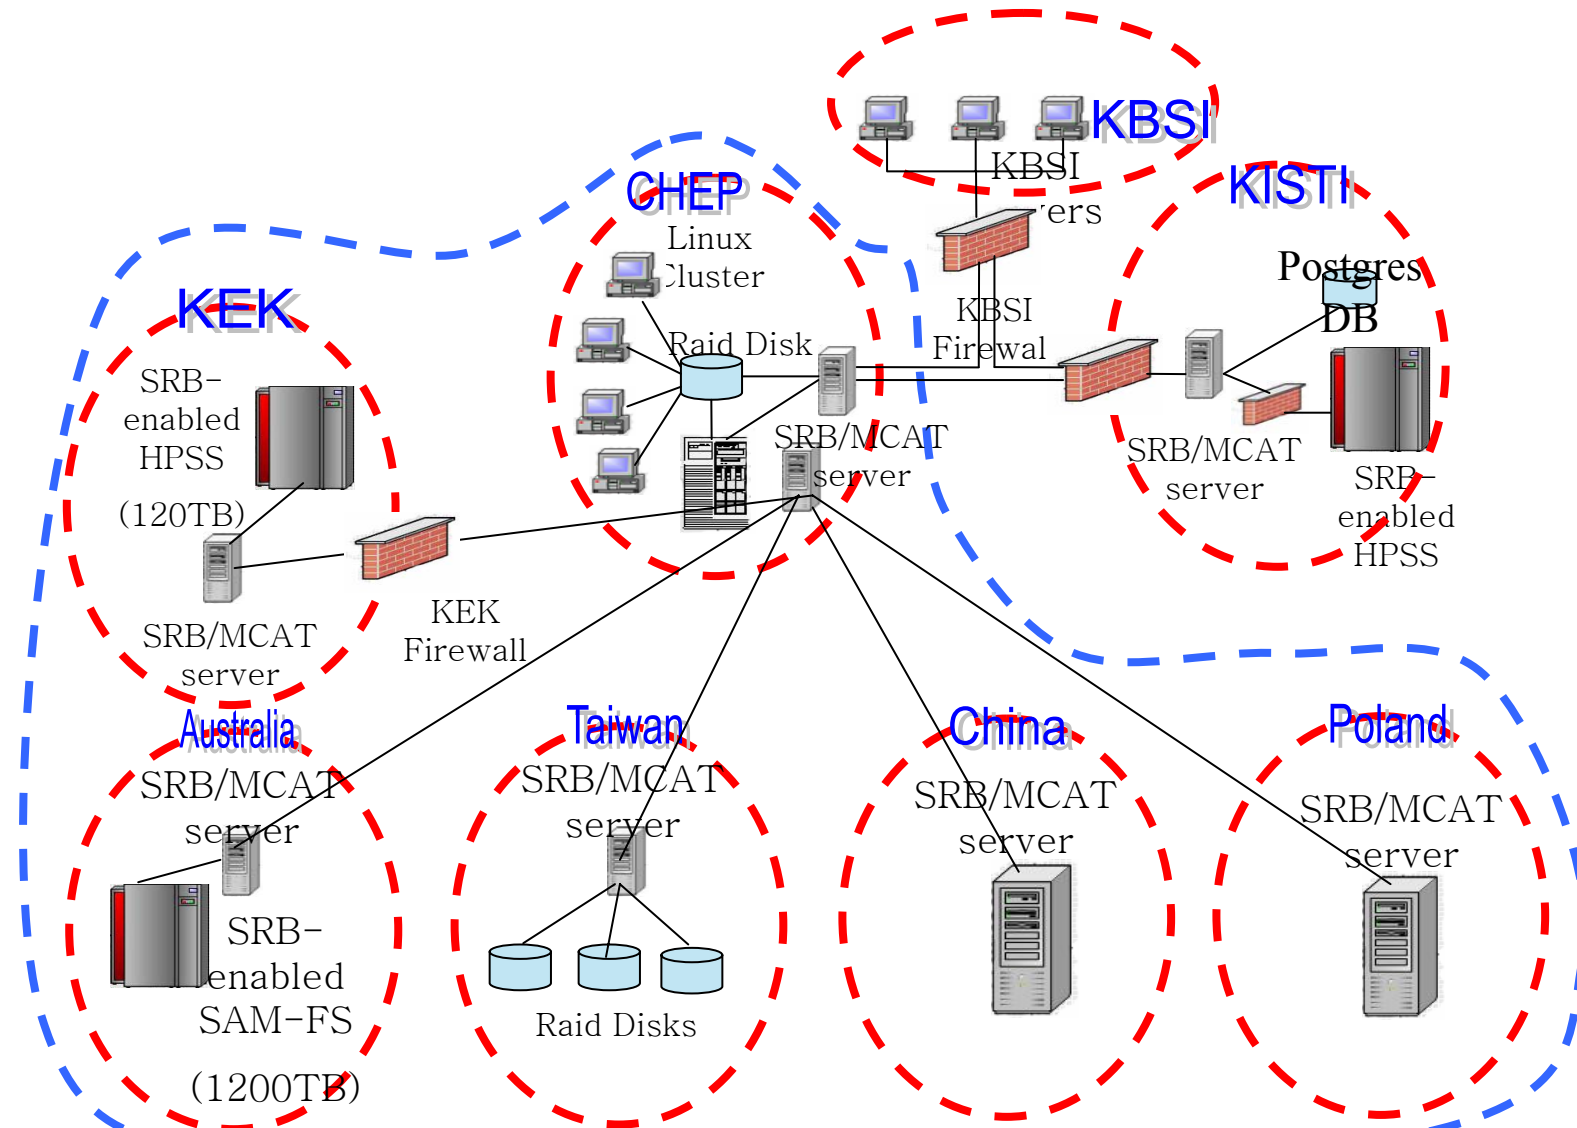

Korea-US record (1.6Gpbs)

2. Storage Resource Broker

3. Computing R&D

- **Data Grid Activity (2002~)**
 - 1) SAMGrid (2002)
 - 2) DCAF(DeCentralized Analysis Farm) for CDF
 - 3) Belle Grid
 - 4) Grid3 farm for CMS
 - 5) LCG2 farm for CMS
 - 6) Interoperability

1) SAM Grid (2002)

SAM - GRID INFORMATION AND MONITORING SYSTEM - Microsoft Internet Explorer

파일(F) 편집(E) 보기(V) 즐겨찾기(A) 도구(T) 도움말(H)

주소(D) http://samadams.fnal.gov:8080/prototype/ 이동

Launching the Monitoring System:

Please click at the map to monitor the execution sites.
Click [here](#) to get information about the submission sites.

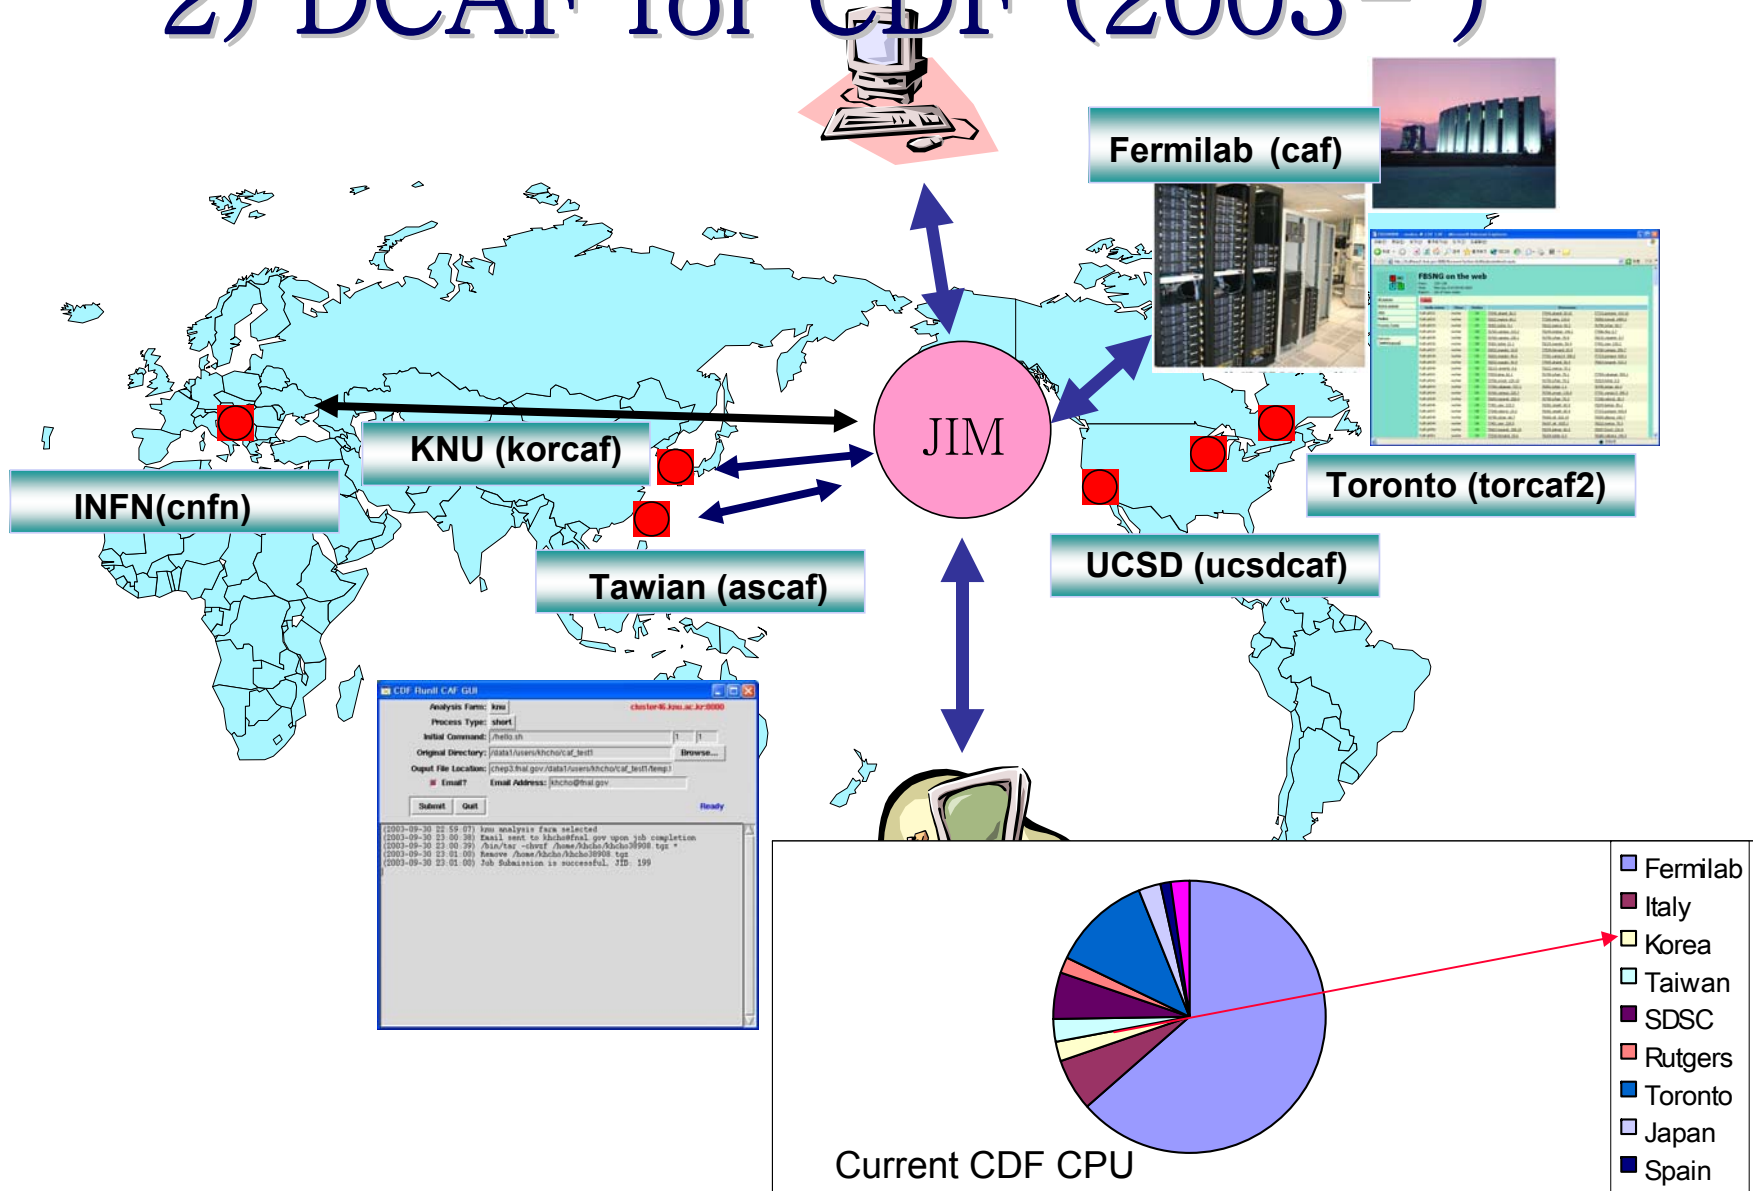

Participating Experiments:

- DO
- CDF

● KNU Site for CDF

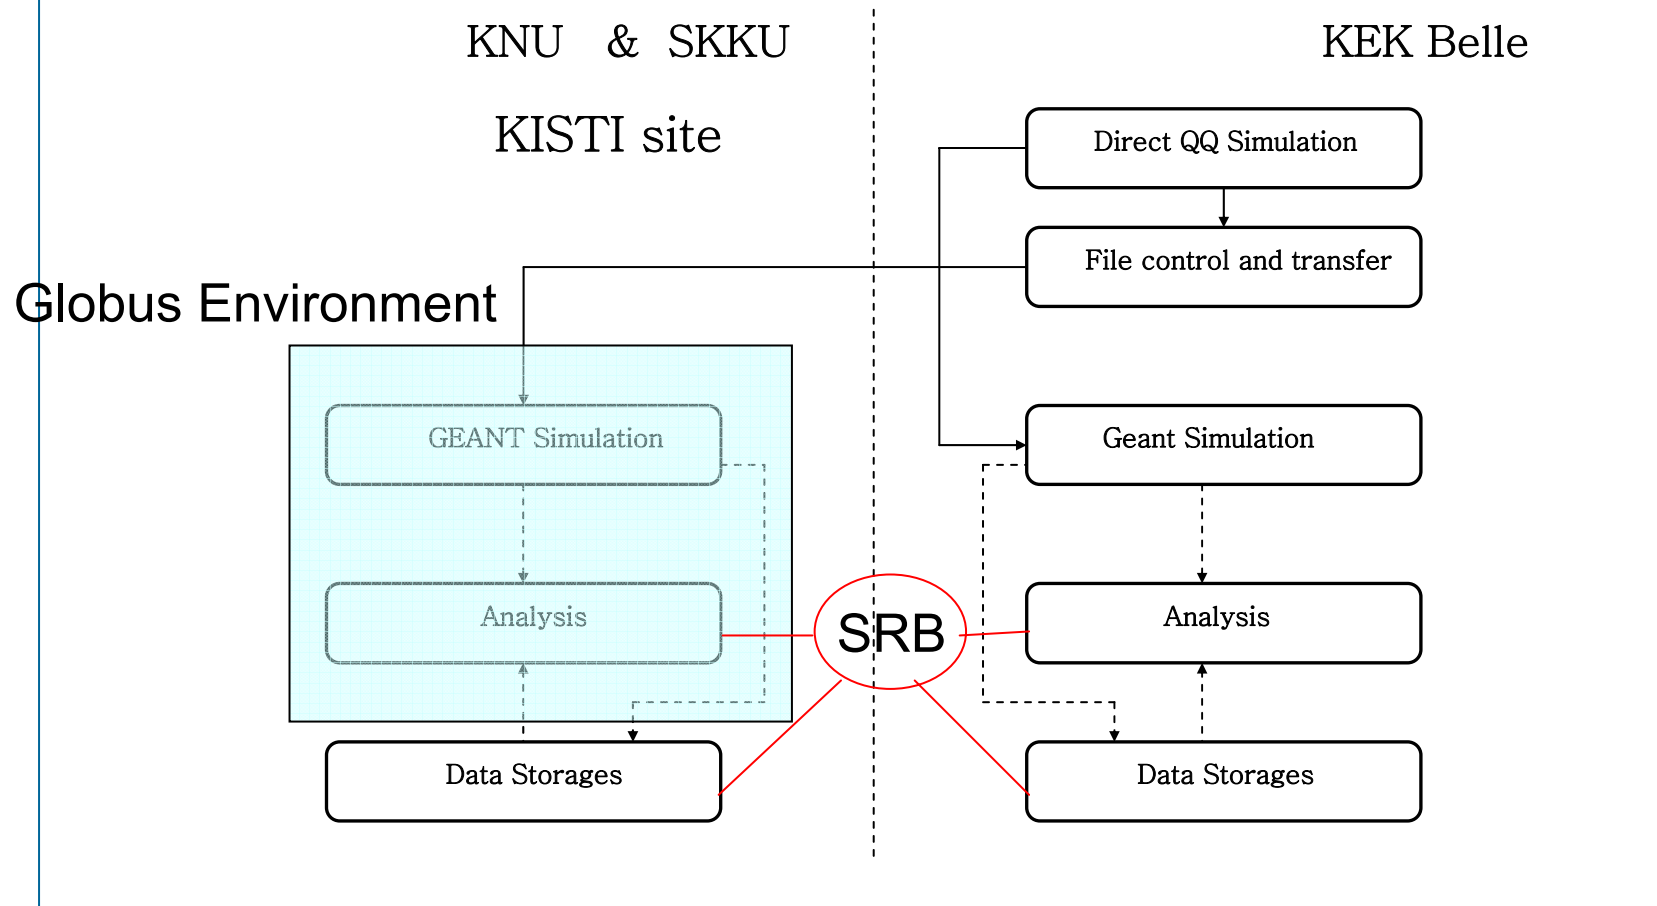

● SC2002

2) DCAF for CDF (2003-)

3) Belle

* KNU-KEK Belle Computing Farm

4) Grid3

GridCat

QCD jet events

⇒ We support 30 institutes for Physics, Astronomy, Biology and Computer Science.

5) LCG2 Farm

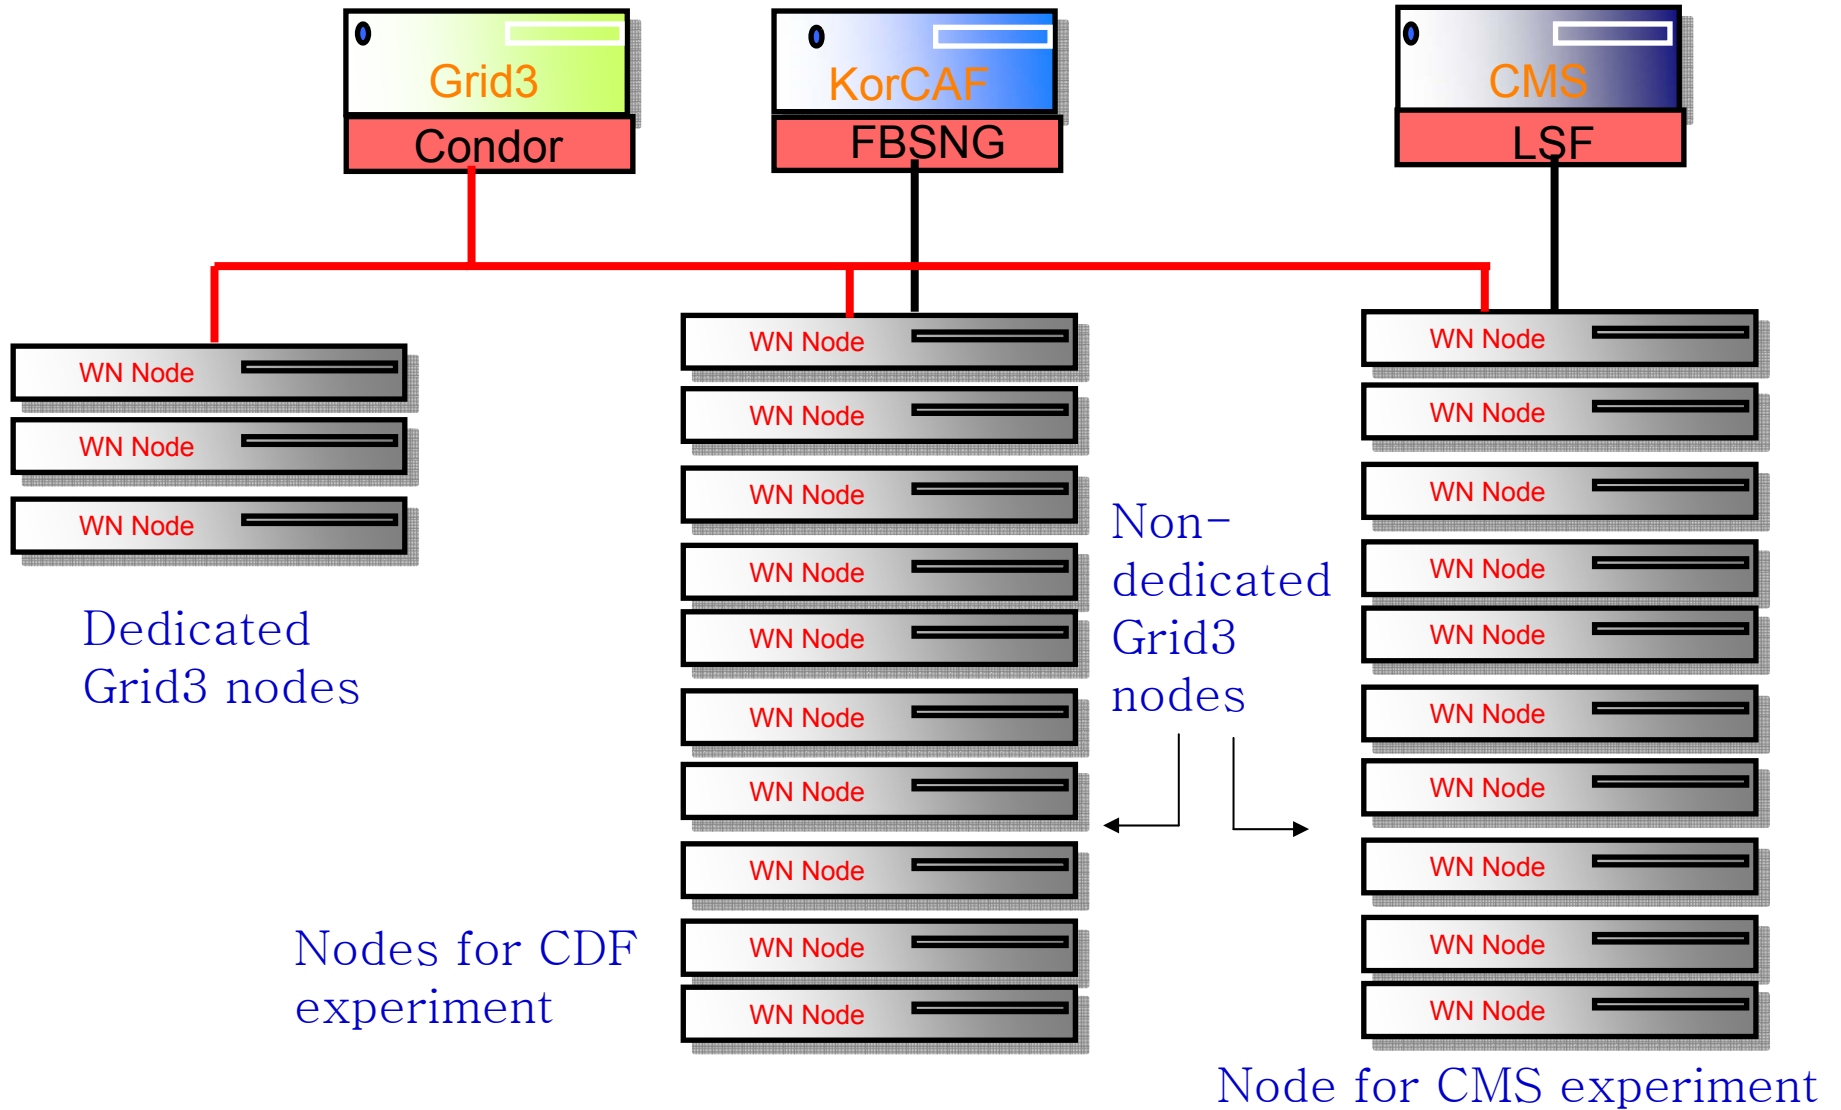

- LCG_KNU Farm

Node	Server
CE	cluster50.knu.ac.kr
WN	cluster69.knu.ac.kr
UI	cluster3.knu.ac.kr
BDII	cluster3.knu.ac.kr
RB	cluster3.knu.ac.kr

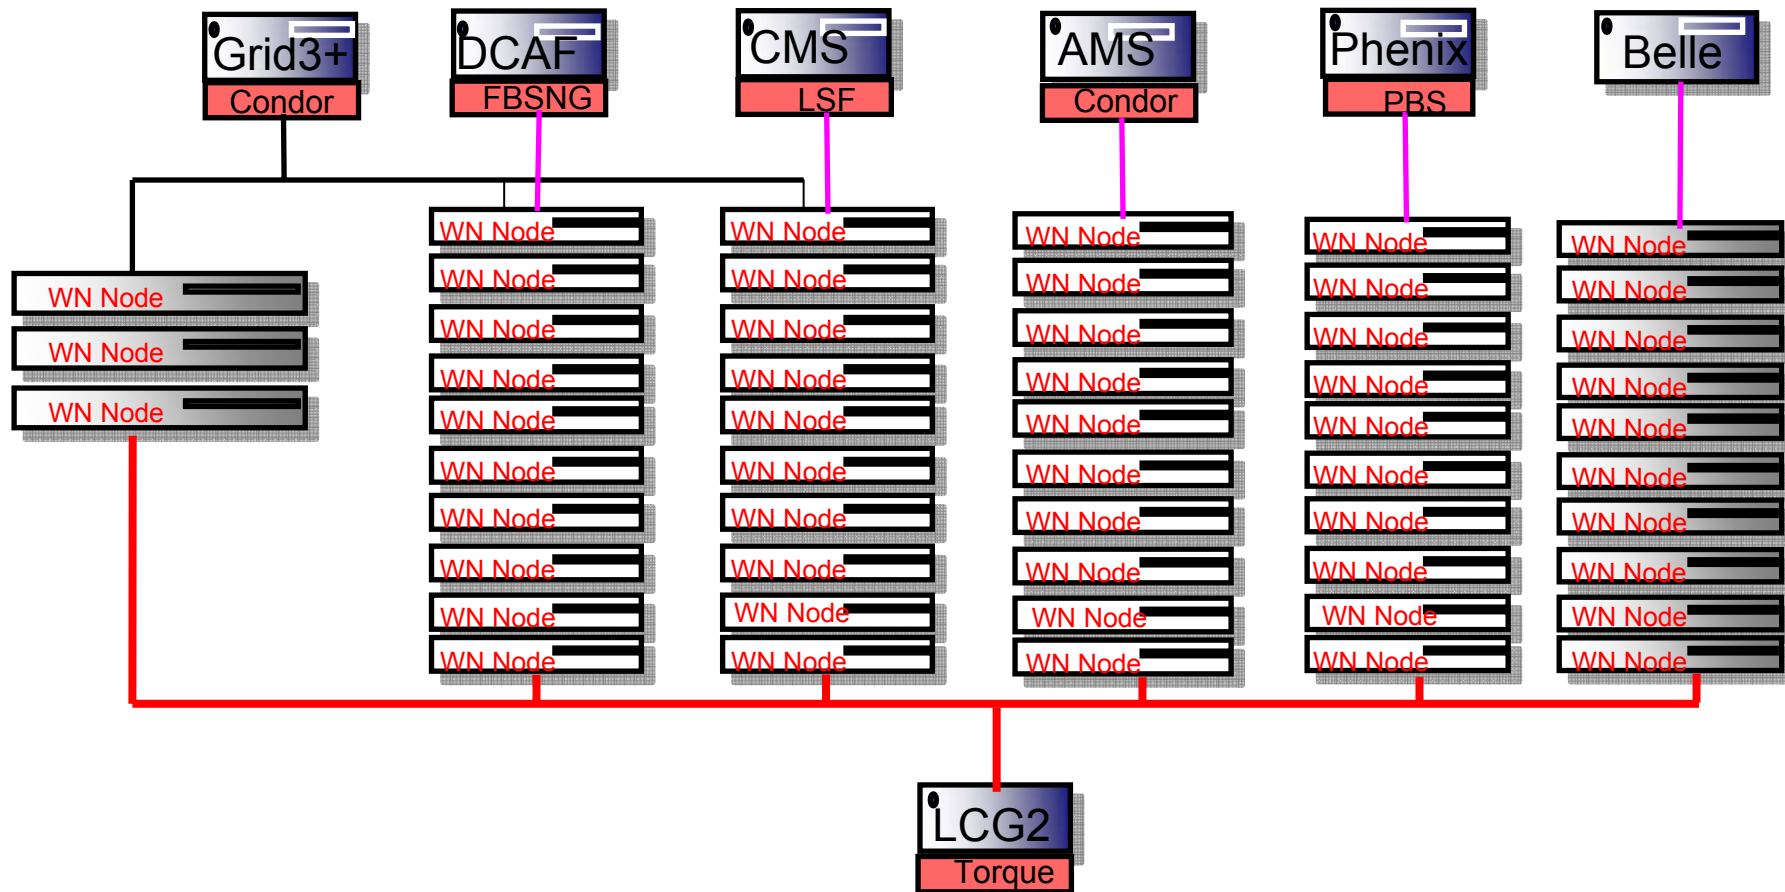

LCG Map in Asia

6) Dual operation system

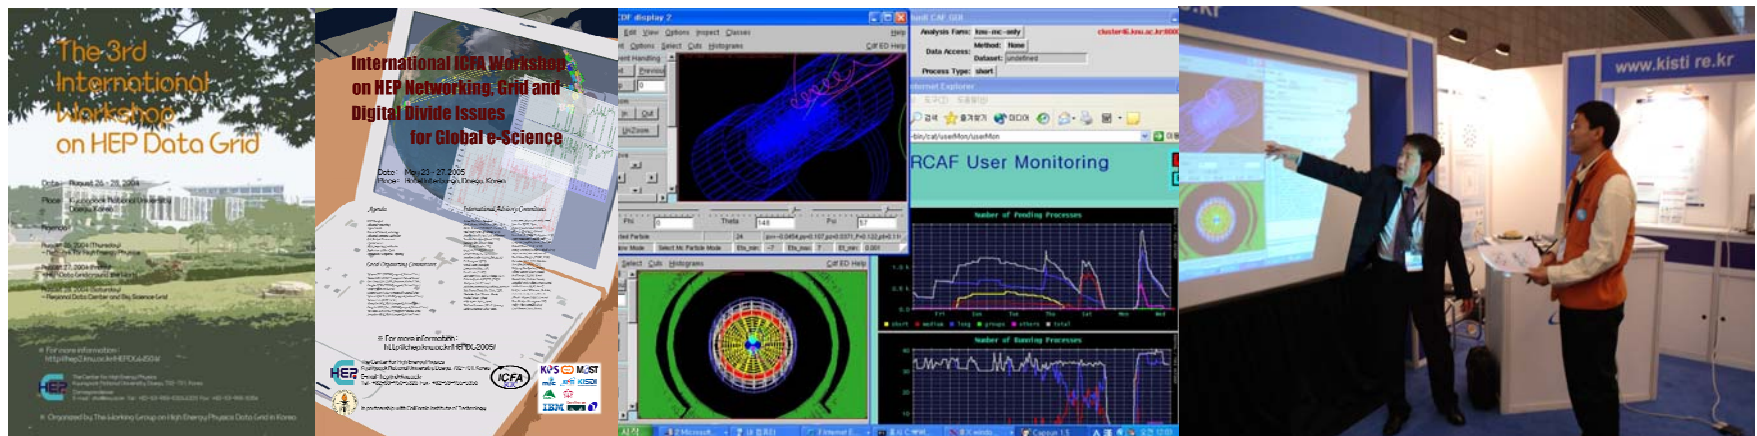

Plan for interoperability @ KNU

Activities in Korea

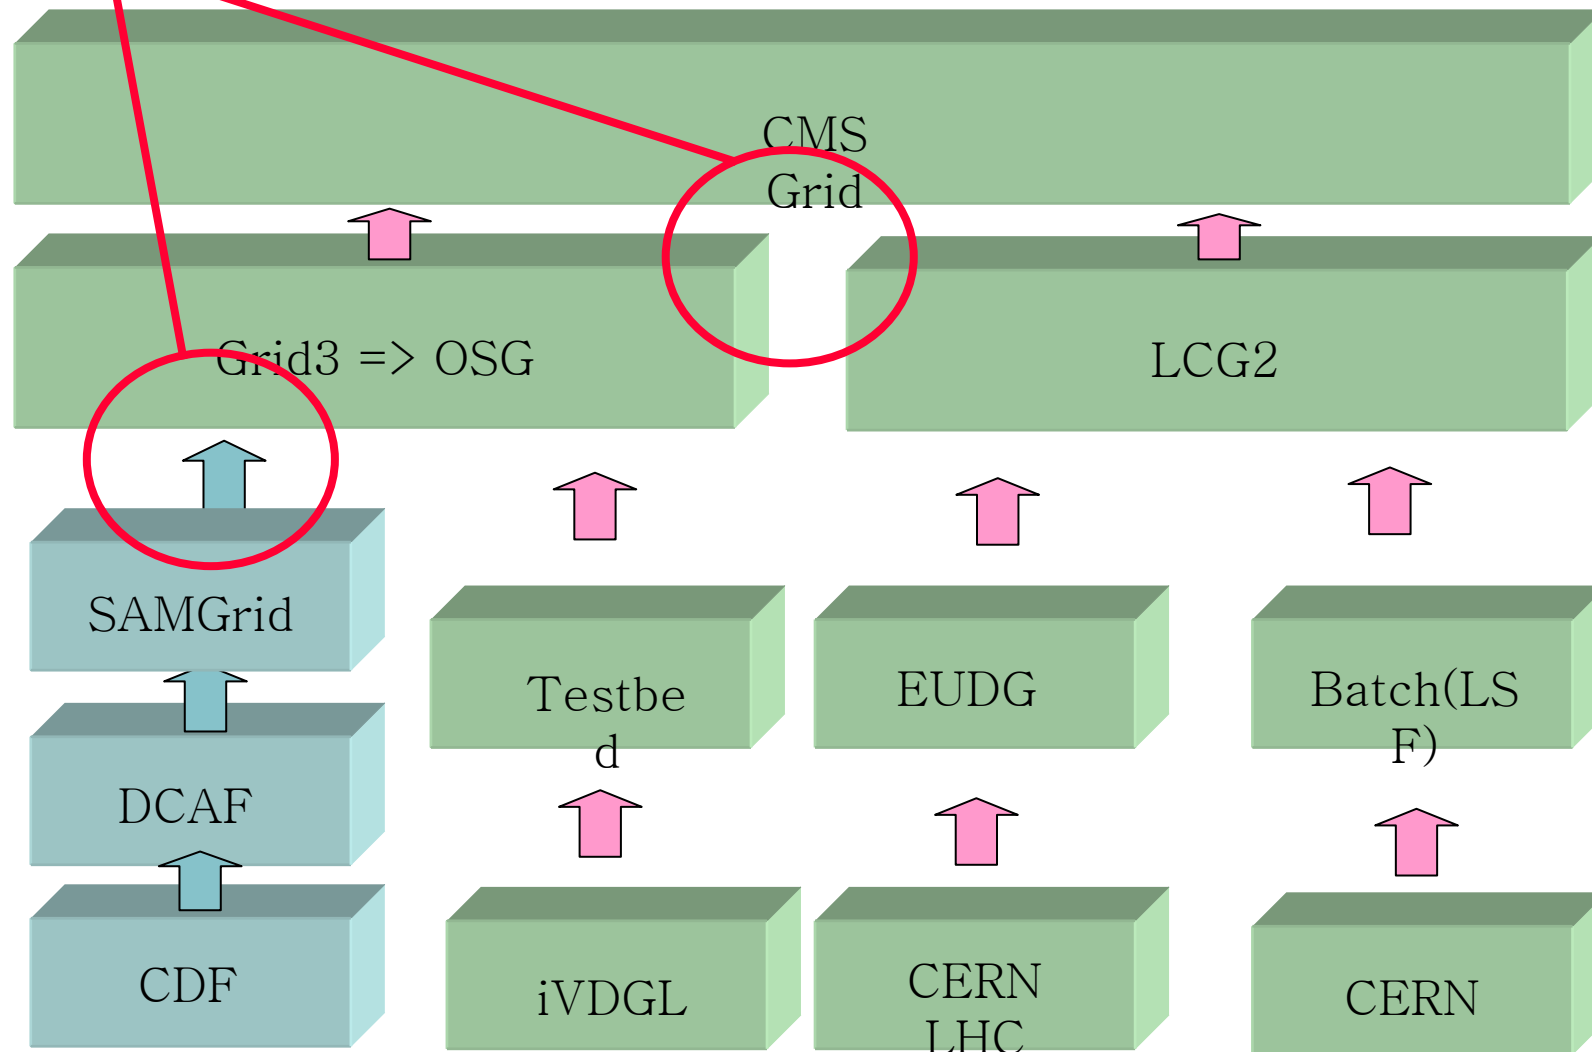

- International HEP Data Grid Workshop
 - 3 times @ KNU (2002-2004)
 - This workshop (2005)
- Demos at SC2002, SC2003, SC2004, GGF13, GFK
 - SAMGrid, Bandwidth Challenge, DCAF, Belle Grid, Grid3
- Constructing KR-CHEP CA, KR-CHEP VO

Korean Group

Future Plan for Grid

Summary

- e-Science is a great concept for High Energy Physics.
- Grid meets e-Science perfectly for resource sharing and virtualization.
- e-Science High Energy Physics should be progressed.

Thank you.

Please enjoy Daegu.
