

Dutch Tier 1 SARA/NIKHEF & SURFnet

Erik-Jan Bos

**Director of Network Services
SURFnet, The Netherlands**

To/T1 networking meeting, Geneva, Switzerland

July 19, 2005

SURFnet

- **Provides the Dutch National Research Network**
- **Not for profit company, 55 employees**
- **100% subsidiary of Stichting SURF**
- **170 connected organizations, 750.000 users**
- **Turnover (2004): 35 M€**
- **Infrastructure services:**
 - innovation paid for by government
 - cost effective exploitation for higher education and research

SURFnet6 on dark fiber

- SURFnet6 will be entirely based on SURFnet owned managed dark fiber via the customer premises
- Approx. 6000 km fiber pairs available today; average price paid for 15 year IRUs:
< 6 €/meter per pair
- Managed dark fiber infrastructure will be extended with new routes, to be ready for SURFnet6

SURFnet6 overview

- **A hybrid optical and packet switching infrastructure**
- **Based on customer-owned managed dark fiber**
- **Native IPv4, IPv6 and Light Path Provisioning over a single transmission infrastructure**
 - **Managed via a single control plane**
 - **Network nodes reduced from 20 routed locations to 2 routed locations**

Paving the way to a ubiquitous and scalable

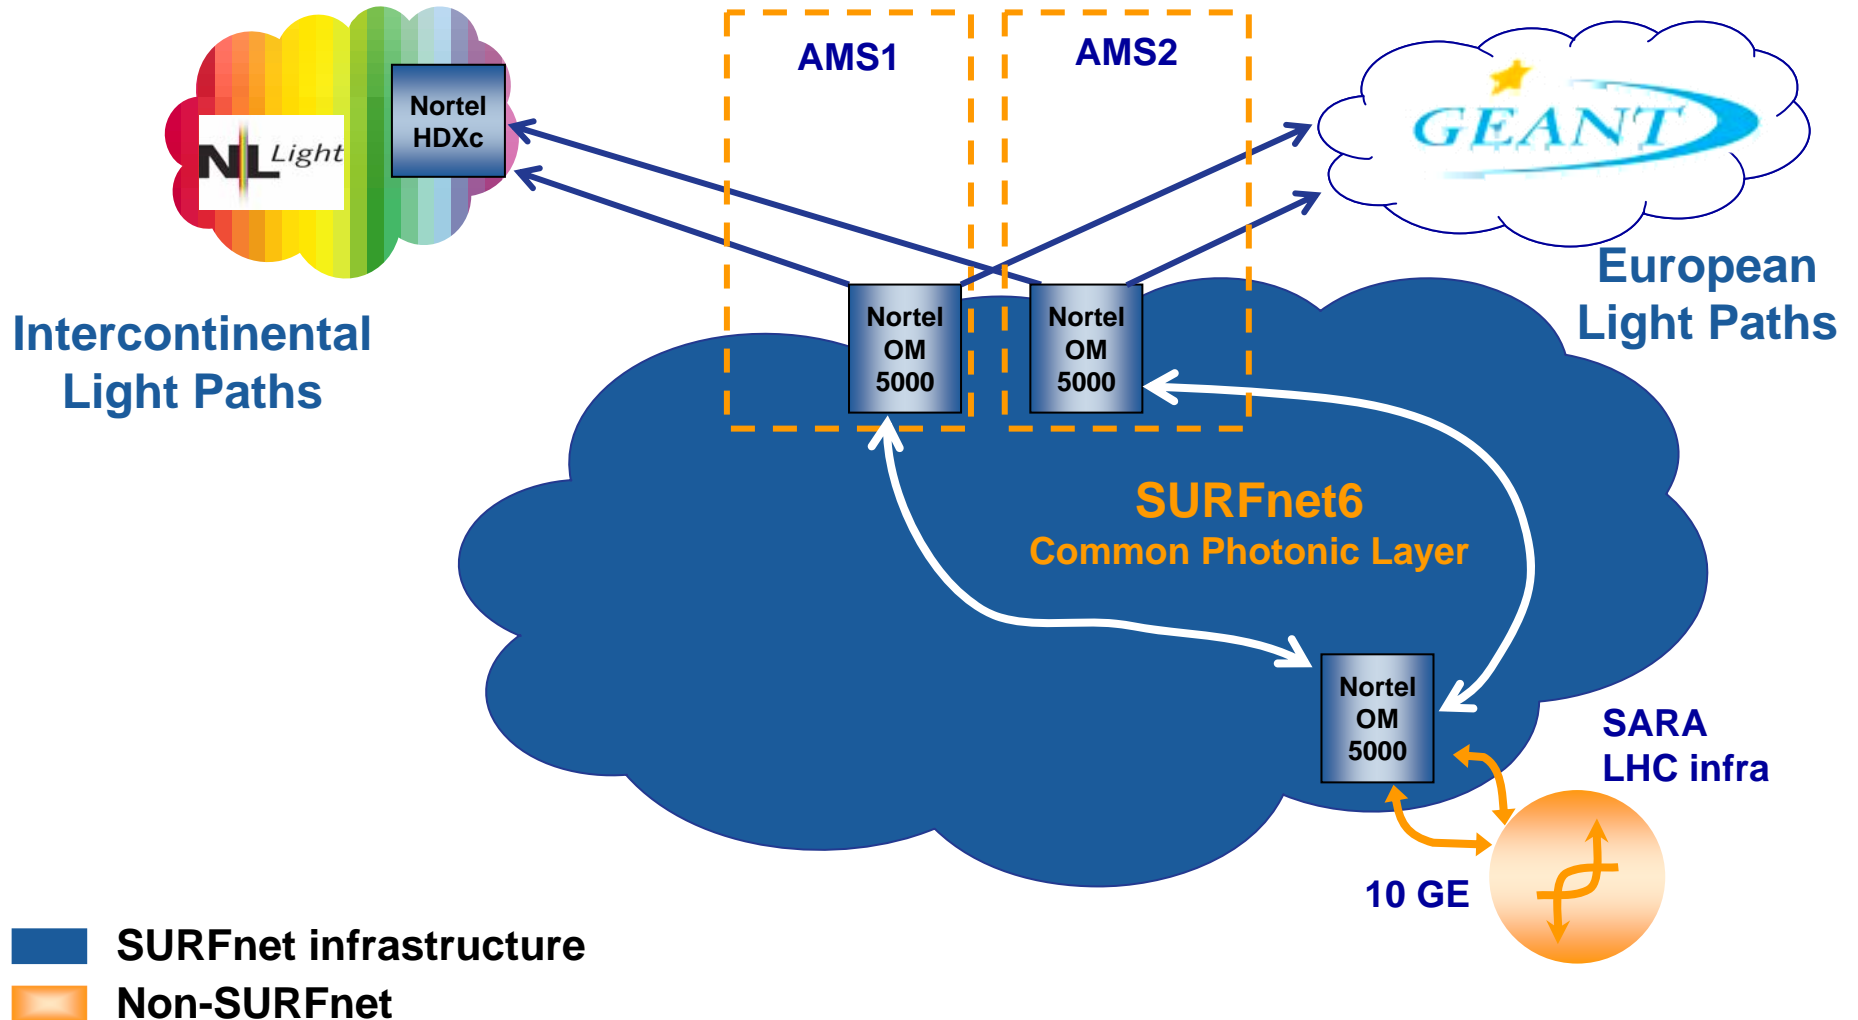

Dutch Tier 1 networking

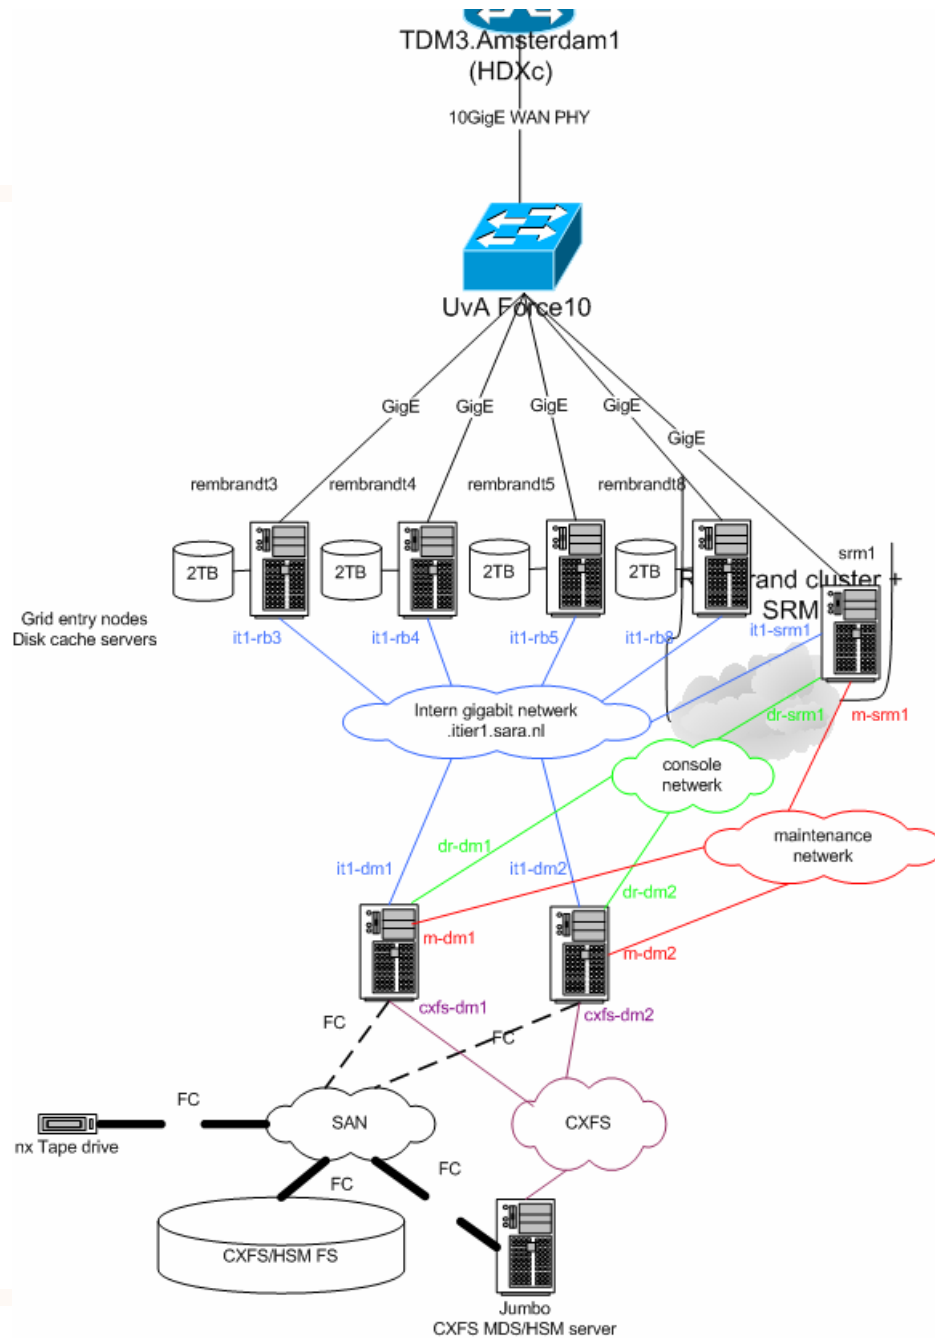

- **SARA connected to SURFnet6:**
 - 10G for commodity IP
 - 10G Light Paths for the LHC OPN, and other projects like DEISA
- **SURFnet connected to GEANT2:**
 - 10G for commodity IP
 - Multiple 10G Light Paths, one will be dedicated for the LHC OPN
- **SURFnet exploring Cross Border Fiber:**
 - With DFN in Germany, e.g. for Dutch T1-German T1 connection

SURFnet6 status

- **Building of optical core and routed core: nearing completion**
- **Start of pre-production: running as of July, 2005**
- **Start of production & start of transition: planned for August, 2005**
- **SURFnet6 has all connected organizations: not later than December 31, 2005**
- **Start of GE and 10GE light path services: January 1, 2006 network-wide, this quarter for Amsterdam**

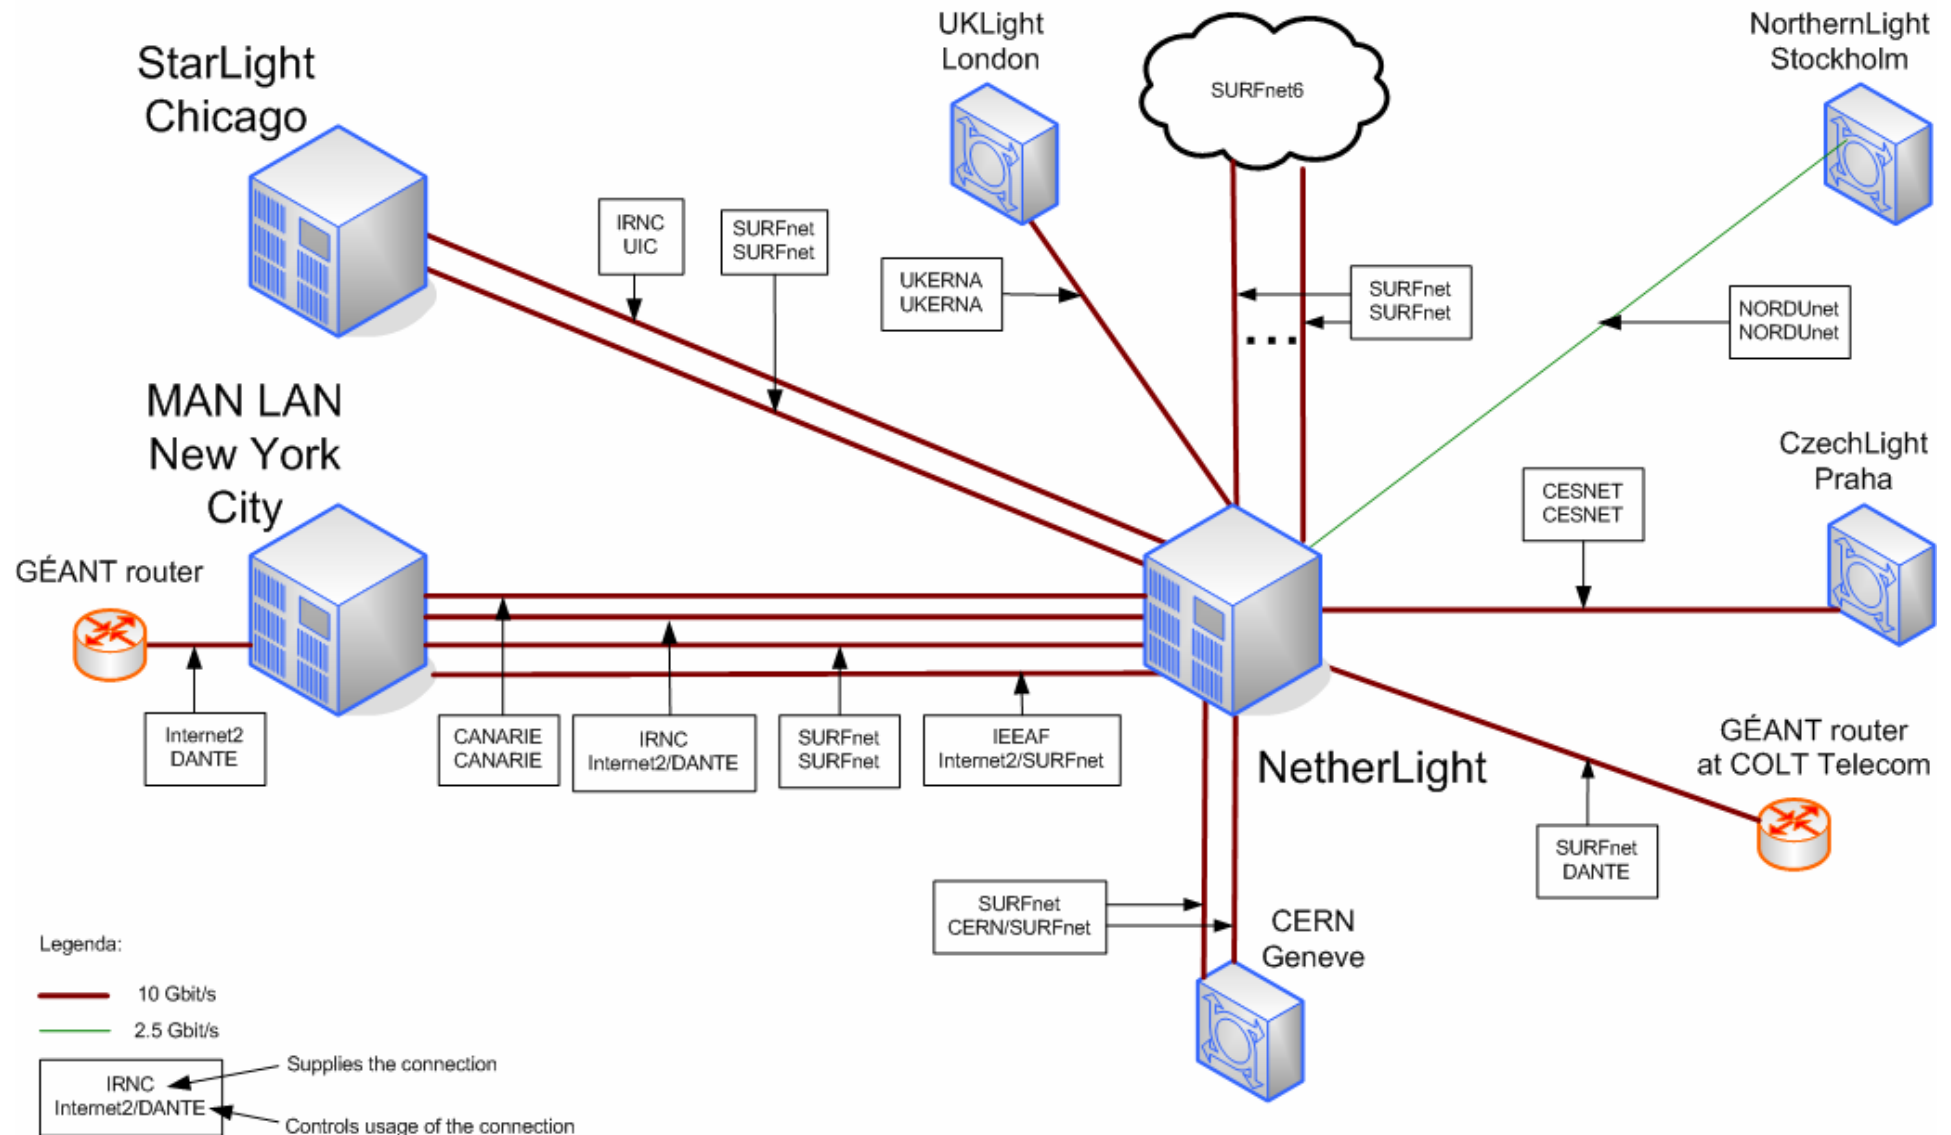

SURFnet6: Light Path Provisioning implementation

NetherLight lambda connectivity

July/August 2005
