

# EGEE Training Report German / Swiss Federation

Dr. Rüdiger Berlich Forschungszentrum Karlsruhe Edinburgh / 28.11.05

INFSO-RI-508833

# Forschungszentrum Karlsruhe

A state of the local section o

- Part of the "Helmholtz Gemeinschaft"
- One of the largest independent German research institutions

Many different research areas ranging from environmental

studies over nano technology to Grid Computing

## **Training Activities - Overview**

- Forschungszentrum Karlsruhe is responsible for organising and/or running of Grid Training activities for the German / Swiss federation
- So far 20 trainings held in or by DECH federation since April 2004
- Some 380 people trained
- Cooperations with NeSC, D-Grid, APAC, Universities/RC
- Course types: LCG-2 and gLite installetion courses, application developers course, usage courses, induction courses, Webservices course, support tutorial
- Local developments: Grid-in-a-box create a Grid in a small local cluster, e.g. to make installation courses easier to manage

 FZK is a Tier-1 centre in LHC, Tier-A centre for BaBar consequently: large portion of particle physicists initially higher demand than resources "New" audiences, e.g. BioMed (Course given ny NeSC in Jülich) SME training given in cooperation with Fraunhofer SCAI and the NA4 group Astronomy (MAGIC) Internal audiences (e.g. NA2 group / course at **TERENA; GGUS)** 

- In EGEE-1: 2 FTEs (1 funded) for "User Training and Induction" (NA3) and "Dissemination and Outreach" (NA2) in DECH federation
- Limited resources means:
  - Fulfill the demand first, then search for new clientele
  - Leverage additional man-power (e.g. by cooperating with Universities
- Cooperate with other partners (e.g. Webservices course by NeSC) to supply a wider variety of course types
  Trainings outside DECH where possible without larger overhead (e.g. in conjunction paper presentations)
  Open interface through open events

# **CALLER OF A CONTRACT OF A CON**

- Major annual training event is GridKa School.
  This year:
  - 17 talks, 4 (== 6) courses
- In 2004 and 2005: 70% EGEE-based
- Open event
- Mixture of lectures and hands-on sessions
- Industry participation

# **Training Activities: Upcoming**

#### In the queue:

- Ikely: courses in conjunction with AusGrid '06
- CHEP School of Computing
- Grid Track with possible trainings at Linux Tag, June 2006
- Lecture at "Fachhochschule" (in cooperation with GSI)
- In the past: several contacts to publishing houses. Book creation limited by resources. But still in the queue ...
- Enhance and extend "Grid in a box"
- GridKa School 2006 (cooperation with D-Grid ??)
