VOMS use in OSG and the US

- VOMS has been deployed since Grid3 as the VO administration tool in the US HEP grids.

- Currently supporting ~15 VOs on OSG.

- VOMRS used by ~1/2 VOs for User VO registration and recording of acceptance of the AUP.

- VOMS and VOMS-ADMIN are part of the VDT.

Dependence on VOMS, VOMS-ADMIN

- OSG-VDT Identity Mapping and Authoriation services - GUMS and Prima - rely on use of VOMS extended attribute certificates.

- US LHC actively using ~3-5 roles on their Tier-2s in the US.

- Agreement for support of the software use in the US from INFN/LCG etc

- Ongoing effort to ensure Early knowledge and understanding of changes in VOMS/VOMS-ADMIN.

- We keep spending effort on re-integration and re-interfacing.

Open Science Grid

- The US is happy to re-use software.

- VOMS gives us the Capabilities that we need.

- We MUST be able to rely on and have confidence in a robust development and evolvement process for several years to come.

- This is high priority for the US and takes precedence over other service developments.
