

Enabling Grids for E-science

Concluding Remarks

Bob Jones, Project Director, CERN

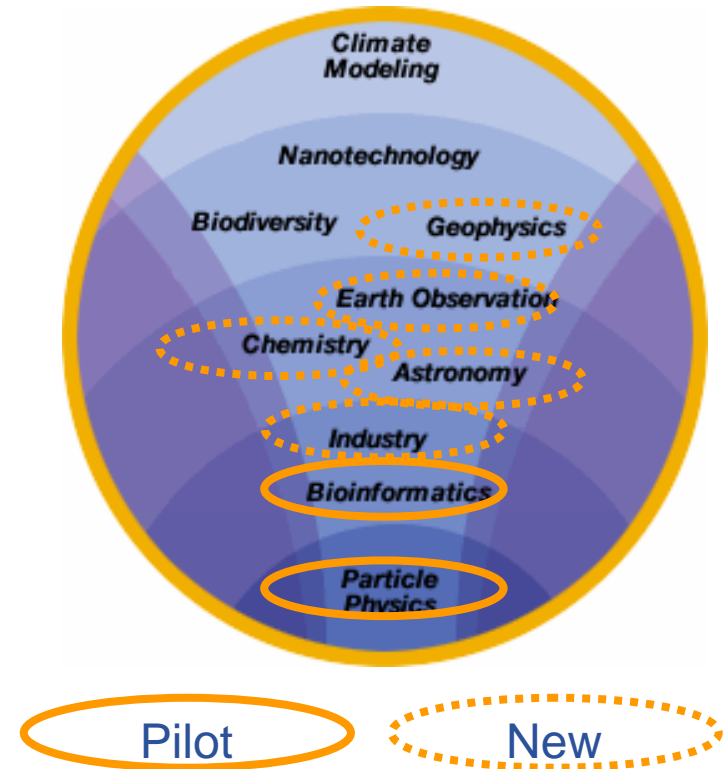

EGEE 2nd review

6-7/12/2005

www.eu-egee.org

- **EGEE is THE largest multi-disciplinary research grid infrastructure in the world**
- **EGEE has lead the way in building a consistent European view of grid infrastructure via a number of related projects and international collaborations**

- **EGEE was proposed as the first phase of a 4 year programme**
- **It is essential to obtain the 2nd phase to expand the present programme and profit from the experience gained and lessons learnt in EGEE**
 - This knowledge has been taken into account in the EGEE-II proposal
- **The input from this review will also be used to improve the programme of work for EGEE-II**
- **We also need to plan a long term sustainable programme and agree this with EGEE national and EU funding agencies**

People are EGEE's best resource
