Thierry.Priol@inria.fr

CoreGRID objectives

- To build a **European-wide research center**
 - To avoid fragmentation of Grid research activities in Europe
 - Create the European “Grid Lighthouse” and be seen as such worldwide
 - To achieve integration and sustainability
- To **build solid foundations for GRID and P2P technologies**
 - Both on a methodological basis and a technological basis
 - Support medium and long term research activities
- **Achieve and promote** scientific and technological **excellence** within & beyond the Grid research community
- Gather and disseminate European research
- A **think-tank** for spin-off projects
 - EC funded, bilateral projects, international cooperations, ...

CoreGRID Membership

42 partners from 18 Countries (1 from S. America)

CoreGRID researchers

- Sep 2004: 118 researchers
- Aug 2005: 145 researchers
- 7 researchers left the Network, 34 new ones were included

CoreGRID PhD students

- Sep 2004: 163 PhD students
- Aug 2005: 169 PhD students
- 22 left the Network, 28 new ones were included

Vision:

- Build a **Virtual Research Center**
 - on GRID and P2P systems
- A VRC consists of **Virtual Research Institutes**
 - on specific topics such as
 - Data management, Programming Models
 - Scheduling, Monitoring
 - Architecture, etc.
- A VRI consists of **Virtual Research Labs**
 - 2-10 researchers from different organizations
 - closely working on the same subject

Operating the Network

- **Administrative & Financial Management**
– **ERCIM**

- **Bruno Le Dantec (Administrative & Financial Coordinator)**
- **Celine Bitoune (Assistant to the AFC)**

- **Scientific & Technical Management**

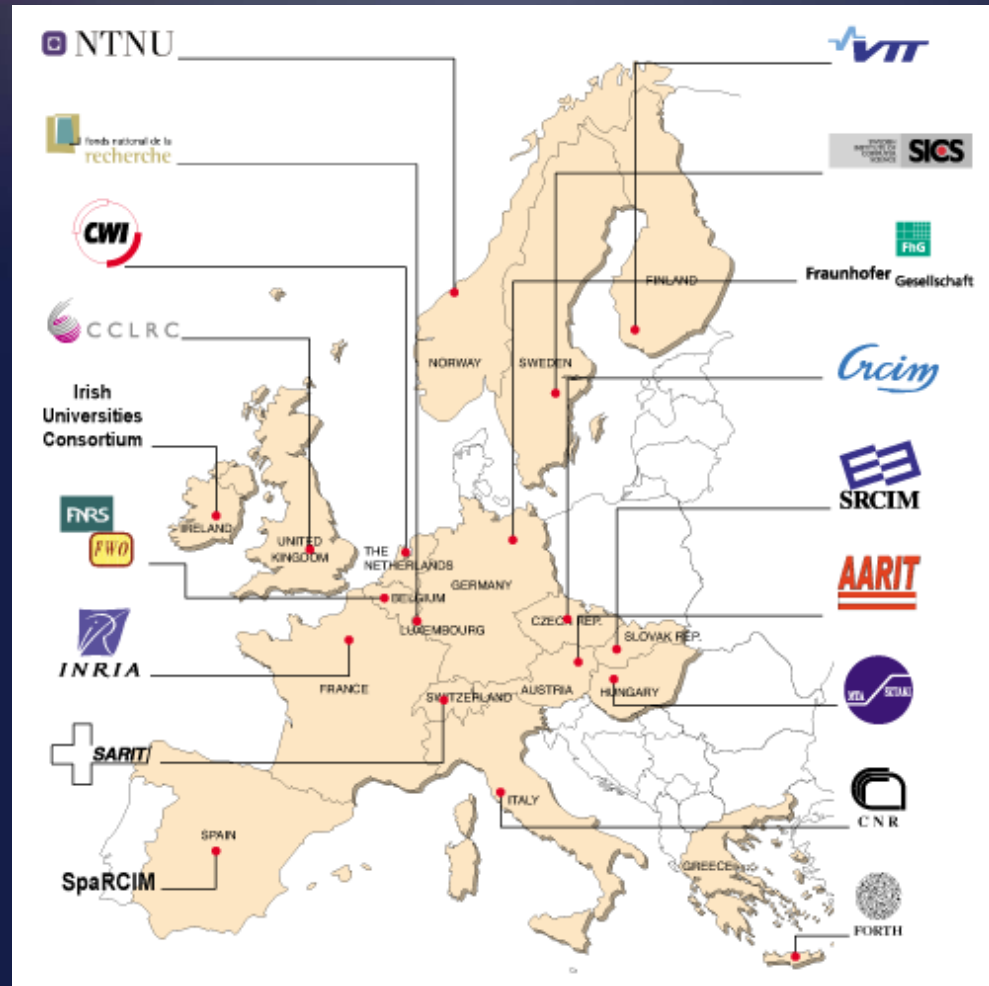

INRIA

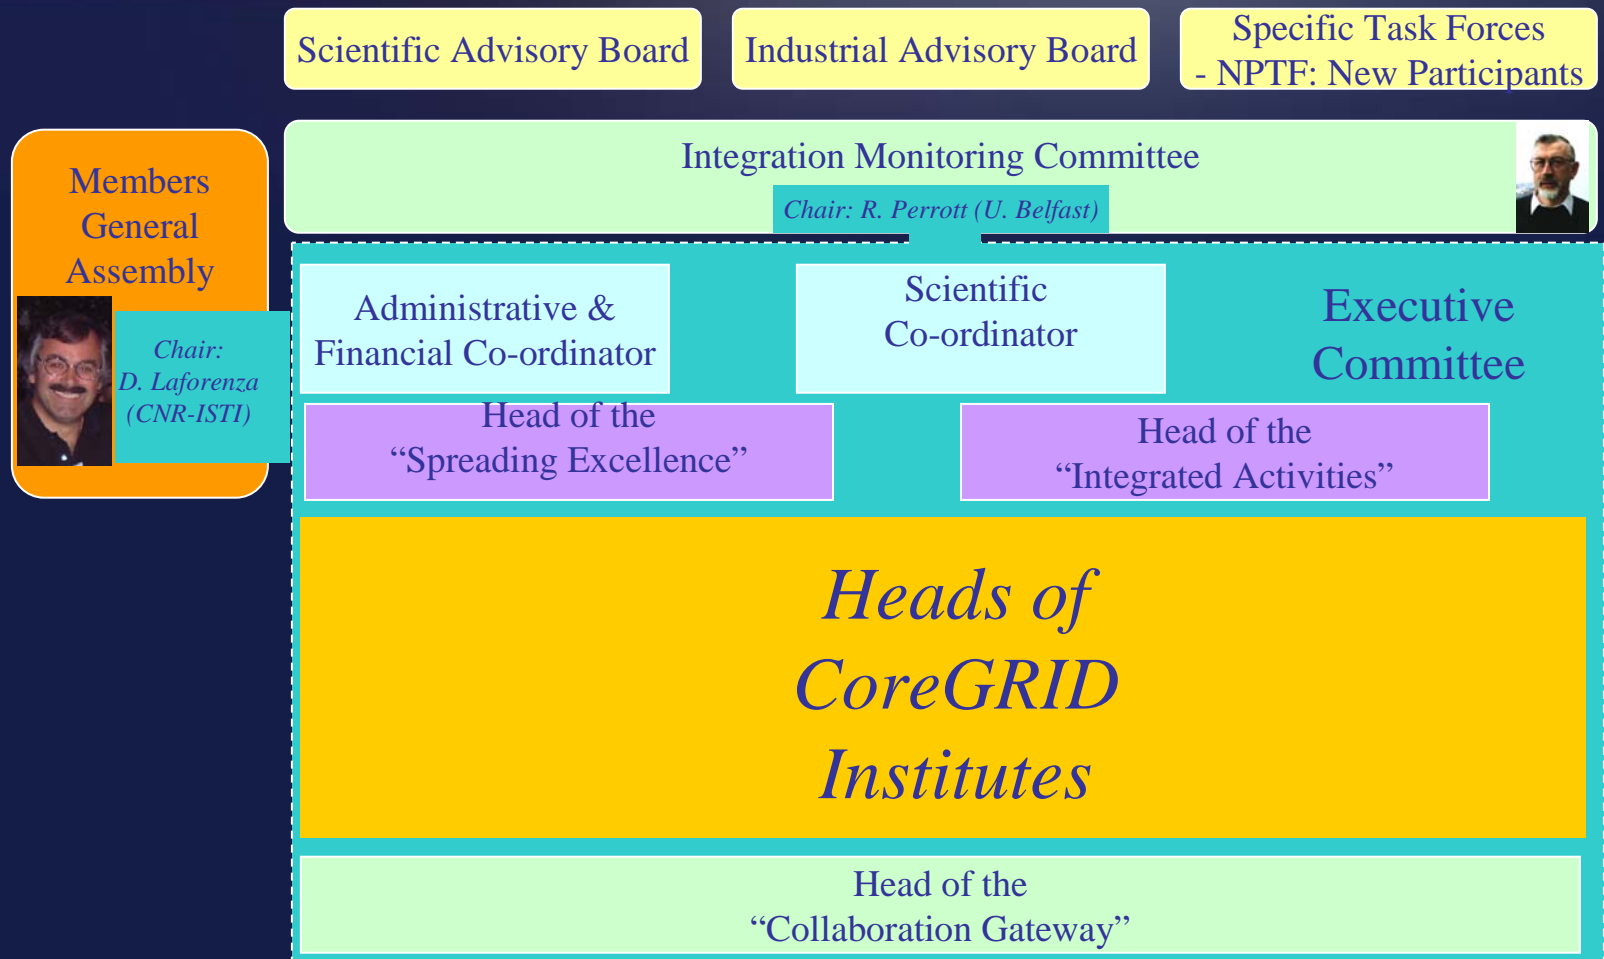

- **Thierry Priol (Scientific Coordinator)**
- **Päivi Palosaari (Assistant to the SCO)**

A brief description of ERCIM

ERCIM is a consortium of leading research institutions from **18 European countries** committed to information technology and applied mathematics.

Organizational map

Scientific Advisory Board (SAB)

Objectives:

- Deliberate on science-related matters of the Network
- **Annual external assessment** of the scientific quality of the work
- Provide **guidance to the strategic orientations**
- Formulate **recommendations** to the Executive Committee
 - on content, planning and execution of the Joint Programme of Activities

Three senior Network scientists and three external advisors + SCO

Internal members:

- Jarek Nabrzyzki (PSNC - Poland)
- Henri Bal (Vrije U. - The Netherlands)
- Uwe Schwiegelshohn (Dortmund U. - Germany)

External members:

- Dennis Gannon (Indiana U. - USA)
- Michel Cosnard (Nice U. - France)
- Sato Sekiguchi (AIST - Japan)

Industrial Advisory Board (IAB)

IAB has four primary objectives:

- To communicate to the Network **European Industry's** long-term Grid-related technology **needs and challenges**
- To **provide** the Network with Grid **validation cases**
- To help identify the market sector(s) to be addressed within the Grid User Community, in order to ensure a quick **adoption of next generation Grid technologies within European industry**
- To report to the Scientific Advisory Board its **recommendation** with respect to future strategic GRID-related research objectives

Industrial Advisory Board

First IAB meeting: June 15, 2005, at UPC, Barcelona

Report written by Monica Marinucci-Lopez, Oracle, CoreGRID IAB secretary

New Participant Task Force

- Set up end of the first year
 - No new participant for the first year
- Objectives
 - Set up procedures to integrate new participants
 - Interaction with the SAB, IAB, IMC and MGA
- Membership
 - D. Laforenza (MGA), B. Le Dantec (AFC), R. Perrot (IMC),
T. Priol (SCO)

A set of well identified research challenges

Knowledge & Data Management

- Handling information/data that are required/produced by a wide range of diverse processing power

Programming Model

- Making the programming of Grid infrastructures as simple and transparent as possible

System Architecture

- Designing the next generation Grid middleware

Grid Information, Resource and Monitoring Services

- Scalable information service to implement a service view of the Grid

Resource Management & Scheduling

- Scheduling jobs/applications/tasks/computation within a Grid environment

Systems, Tools and Environments

- Integrating various middleware, tools and applications for problem solving

A Network operated as a European-wide Research Laboratory

Coordination approach for preparing joint research proposals

Goal: Provide assistance to the CoreGRID members in the preparation of international research proposals by:

- Establishing a list of funding sources relevant to the NoE's activities
- Soliciting collaborative research (at least two countries involved);
- Evaluating the quality of the proposals prior to the submission (IMC).

The CoreGRID private website provides access to information on:

- Funding programmes at national and European level, including Marie Curie Actions & IST programme;
- Accepted proposals;
- Rejected proposals .

url: <http://www.coregrid.net/mambo/content/view/117/123/>

CoreGRID Integration Workshop 2005

- Summarized the integration work of Year 1
- 28-30 November in Pisa
- 124 attendees: All partners, SAB and IAB.
- 50 reviewed presentations, incl. 46 cooperation papers:
 - 23 full (20 min)
 - 27 short (10 min)
- 179 authors
- 2 keynote speeches (SAB and IAB)
- 2 general discussions (Trust & Security, Panel)
- Preliminary Proceedings: both printed and electronic versions
- Selected papers → Book by Springer-Verlag (early 2006)

Durable mobility of researchers

- Internal mobility is essential for integration and to ensure stronger co-operation among partners, promote career development and mobility
- 2 activities :
 - **Fellowship Programme** - Young researchers hosted by two institutes for two distinct periods ~ 600 k€
 - CALL 1, JANUARY 2005 (12 applications and 3 candidates selected)
 - CALL 2, MAY 2005 (28 applications and 4 candidates selected)
 - CALL 3, DECEMBER 2005 (5 positions offered)
 - **Research Exchange Programme** - Researcher or student from 1 member to another, two weeks to six months~ 480 k€

Public Website

www.coregrid.net

- Internal and External Communication
- Regularly updated
- Visitors counted since mid April 05
 - Apr 14: 90,508 visits
 - May 31: 123,000 visits
 - Aug 26: 227,701 visits
 - Dec 2: 337,631 visits
- Visibility: score of 8/10 in the Google PageRank

36% from non-european countries

The screenshot shows the CoreGRID website interface. At the top, there is a search bar and navigation icons. The main header includes the CoreGRID logo and the text: "European Research Network on Foundations, Software Infrastructures and Applications for large scale distributed, GRID and Peer-to-Peer Technologies". The date "Friday, 02 December 2005" is displayed in the top right corner.

The main content area features a "Main Menu" with links to Home, News, About CoreGRID, CoreGRID & Industry, Virtual Institutes, Integration Activities, Spreading Excellence, Forthcoming Events, Links, Contact Us, Collaboration Gateway, Other Collaborations, and Mobility Portal. Below the menu is a "Login Form" with fields for Username (pre-filled with "ledantec"), Password, and a "Remember me" checkbox. There are also links for "Login", "Forgot your password?", and "Who's Online" (showing 26 guests online).

The central news section is titled "CoreGRID Integration Workshop 2005" and provides details about the workshop held in Pisa, Italy, from November 28-30, 2005. It mentions that the workshop is open to participants of the CoreGRID network and others interested in cooperating with the network. Research papers are invited to be submitted by September 20. The hotel reservation should be made ASAP using the reservation form provided on the workshop website. The last update is dated Monday, 26 September 2005.

A "Welcome to CoreGRID" section follows, describing the network's goal of strengthening and advancing scientific and technological excellence in the area of Grid and Peer-to-Peer technologies. It mentions that the network brings together a critical mass of well-established researchers (119 permanent researchers and 165 PhD students) from forty-two institutions who have constructed an ambitious joint programme of activities. This programme is structured around six complementary research areas that have been selected on the basis of their potential for excellence.

On the right side, there is a "Newsfeeds" section with an RSS icon and a "Hit Counter" showing 337739 visitors.

CoreGRID - Network of Excellence
URL: <http://www.coregrid.net>

CoreGRID is a Network of Excellence funded by the European Commission under the Sixth Framework Programme
Project no. FP6-004265

CoreGRID Springer series

CoreGRID negotiated a series of books with Springer

1. **Vol 1: Component Models and Systems for Grid Applications (2005)**
2. **Vol 2: Future Generation Grids (2005)**
3. *Vol 3: Proceedings on the 1st CoreGRID Workshop on Knowledge and Data Management in Grids (to appear)*
4. *Vol 4: Proceedings on the CoreGRID Integration Workshop 2005 (to appear)*

Grid User Community & Newsletter

Grid User Community

- Electronic mailing list
- Scientific – Industry – Public
- Expanded through other Newsletter mailing lists

Quarterly Newsletter

- Nr. 1: February 2005
- Nr. 2: May 2005
- Nr. 3: September 2005
- Nr. 4: January 2006
- Editorial board: *Anne Falier, Rosa Badia, Ron Perrott, Vladimir Getov, Thierry Priol, Domenico Laforenza and Per Brand*
- Sent to the GUC
- Infos relayed by other Newsletters

CoreGRID Brochure

- Electronic & Paper (4,000 copies)
- Set-up CoreGRID visual identity

Training & Education activities

- Training and Education Website
- Annual CoreGRID **Summer Schools**
- In 2005 :
 - EPFL, Lausanne, Switzerland, 5-9 September
 - Targeted to young computer science PhD students
 - 40 participants (fully booked)

Conclusion

CoreGRID started in September 1st, 2004

- A very active project that has **completed successfully its first year**
- Involvement of the **main European Key players** in Grid computing (both institutions and researchers)
- The **only one Network of Excellence in Grid** funded by the EU

Mobility Portal

Encourage exchange of personnel and staff mobility

The Network have a specific mobility programme, and allocates substantial funding to it, aimed at encouraging researchers, post-docs and PhD students to stay, for a given period, in research teams of Network participants. This mobility programme fosters better relationships between network researchers and increases the effectiveness of the Network.

The **mobility for the researchers** will consist of scientific visits and research stays between members of different CoreGRID institutions, as for example those involved in the same WP research task. Typical stays will be of one month, although other durations could be considered. For each stay a joint proposal from the visitor and hosting institutions should be presented, describing a project summary about the interest of the stay.

the CoreGRID **Fellowship Programme** (FP) is inspired by the Marie Curie Actions and the ERCIM Fellowship Programme. Young researchers hosted by one or two research facilities for two distinct 6, 9 or 12 months periods, will be funded by the CoreGRID Fellowship Programme to closely interact with major researchers and leading scientific communities. The Fellows will participate in regular in-house discussions and seminars and contribute to the CoreGRID effort in order to integrate scientific activities and dissemination across Europe.

The FP is intended for postgraduate students who want to work in research groups involved in CoreGRID activities. The successful Fellows must agree to engage in the research topic proposed by one or both of the hosting Institutions

In addition to the training activities, the FP will promote **career development**, ideally within the network to preserve excellence in the research environment.

developerWorks

During the GlobusWORLD conference in Boston, developerWorks, together with writer Hal Hensley, had an opportunity to sit down with Ken King, vice president of IBM Grid computing. We engaged in a wide-ranging discussion regarding the state of grid computing and IBM's current activities, positions, and ideas on this front.

[Interview: Ken King on the state of grid computing](#)

Testbed Activities

- **Objective: giving support by collecting and providing to the NoE:**
 - experience made in existing CoreGRID testbeds,
 - information about testbeds in European and national Grid projects,
 - general best practice information with respect to operating Grids,
 - frequent problems and possible solutions.
- **We give support for facilitating the access to testbeds by mediating between CoreGRID Grid testbed providers and other CoreGRID partners needing access to a testbed**
- **We do not create a common, unique CoreGRID testbed, e.g.**
 - based on a common middleware,
 - with a common security approach,
 - with a network infrastructure based on VPNs,

Activities on Trust & Security

- A horizontal integration activity across the NoE, with the following objectives :
 - Provide survey material summarising work on trust and security carried out outside CoreGRID
 - Conduct a critical analysis of the requirements of each CoreGRID research WP from a trust and security perspective
 - Establish a Web portal on Trust & Security, as a communication forum on these issues
 - Liaise with standardisation organisations (GGF, W3C, IETF, OASIS) and other Grid projects

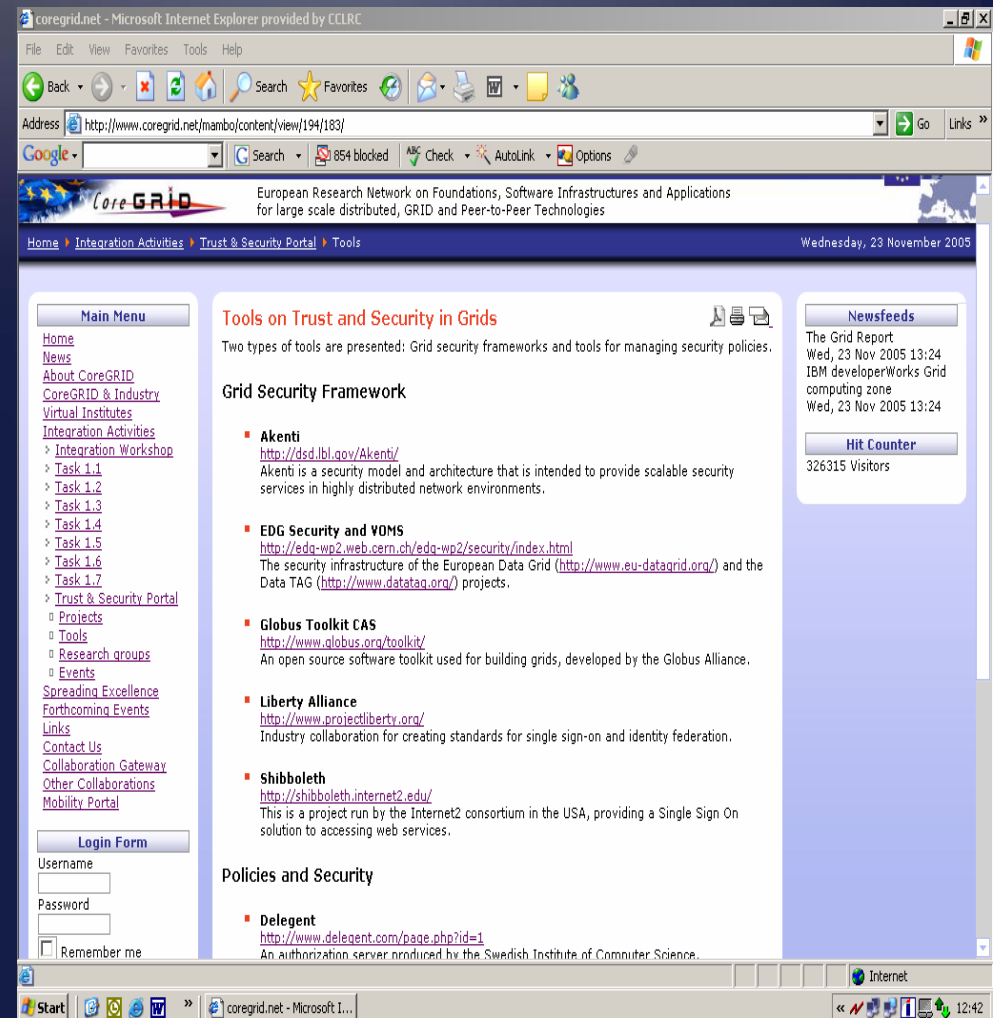

Web Portal on Trust and Security

- Serving as a communication forum on Trust & Security for the Grid community

<http://www.coregrid.net/mambo/content/view/192/181/>

- Includes information about
 - Projects
 - Tools
 - Research groups
 - Events related to the area

- Will be updated regularly

The screenshot shows a Microsoft Internet Explorer browser window displaying the CoreGRID website. The address bar shows the URL: <http://www.coregrid.net/mambo/content/view/194/183/>. The page header includes the CoreGRID logo and the text: "European Research Network on Foundations, Software Infrastructures and Applications for large scale distributed, GRID and Peer-to-Peer Technologies". The navigation menu includes: Home, Integration Activities, Trust & Security Portal, and Tools. The date is Wednesday, 23 November 2005.

The main content area is titled "Tools on Trust and Security in Grids" and contains the following sections:

- Grid Security Framework**
 - Akenti**: <http://dsd.lbl.gov/Akenti/>. Akenti is a security model and architecture that is intended to provide scalable security services in highly distributed network environments.
 - EDG Security and VOMS**: <http://edg-wp2.web.cern.ch/edg-wp2/security/index.html>. The security infrastructure of the European Data Grid (<http://www.eu-datagrid.org/>) and the Data TAG (<http://www.data-tag.org/>) projects.
 - Globus Toolkit CAS**: <http://www.globus.org/toolkit/>. An open source software toolkit used for building grids, developed by the Globus Alliance.
 - Liberty Alliance**: <http://www.projectliberty.org/>. Industry collaboration for creating standards for single sign-on and identity federation.
 - Shibboleth**: <http://shibboleth.internet2.edu/>. This is a project run by the Internet2 consortium in the USA, providing a Single Sign On solution to accessing web services.
- Policies and Security**
 - Delegent**: <http://www.delegent.com/page.php?id=1>. An authorization server produced by the Swedish Institute of Computer Science.

On the left side, there is a "Main Menu" with links to Home, News, About CoreGRID, CoreGRID & Industry, Virtual Institutes, Integration Activities, Integration Workshop, Task 1.1 through 1.7, Trust & Security Portal, Projects, Tools, Research groups, Events, Spreading Excellence, Forthcoming Events, Links, Contact Us, Collaboration Gateway, Other Collaborations, and Mobility Portal. Below the menu is a "Login Form" with fields for Username and Password, and a "Remember me" checkbox.

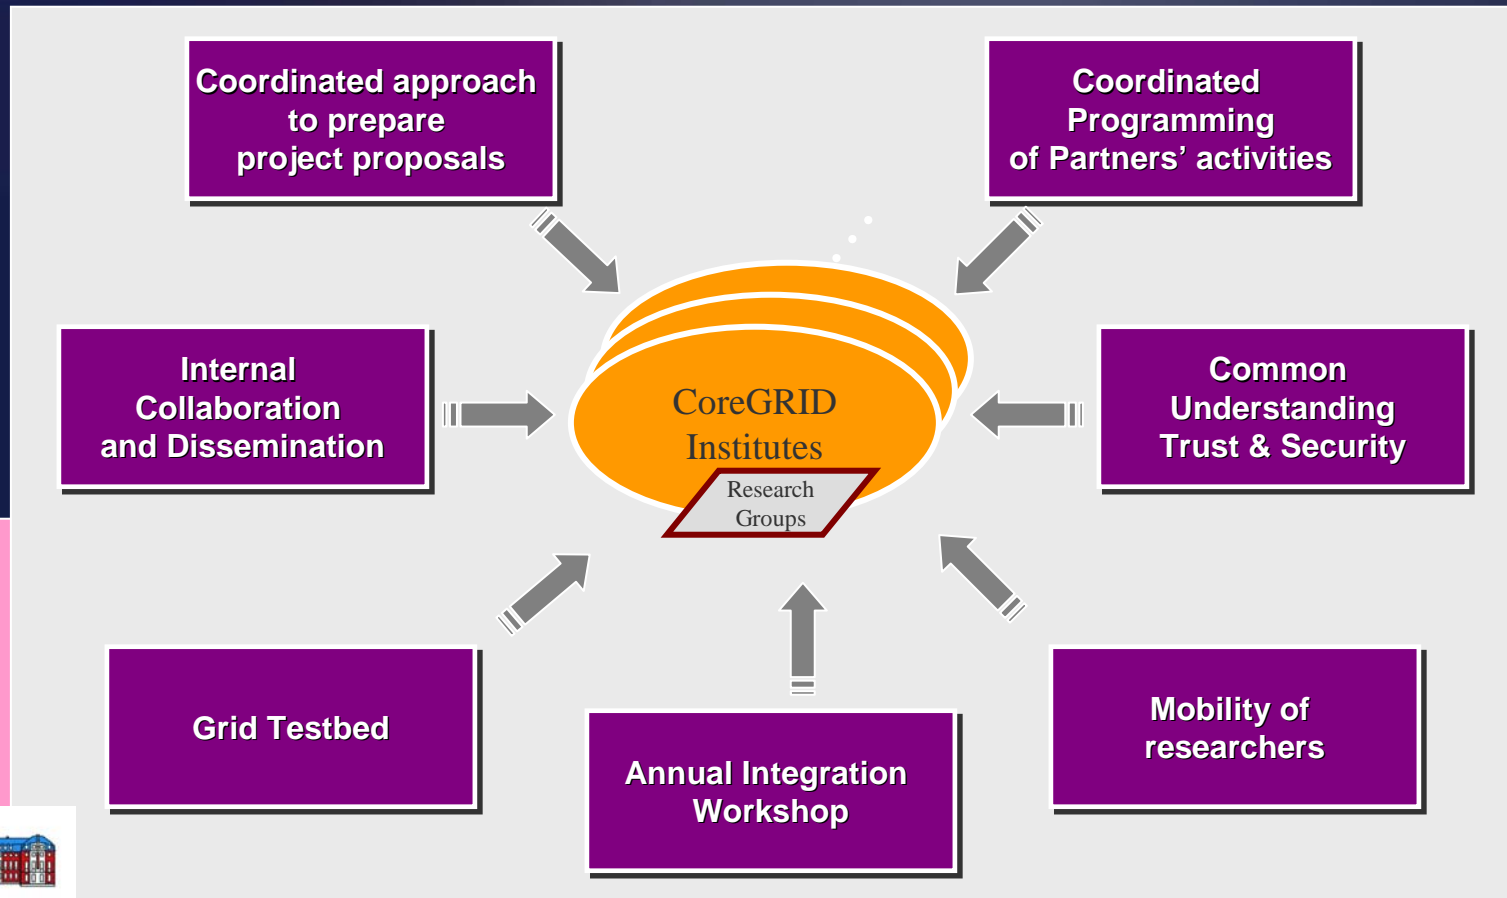

On the right side, there is a "Newsfeeds" section with a "Hit Counter" showing 326315 Visitors.

CoreGRID Integration Workshop

- Annual workshop to discuss . . .
 - possible overlappings and synergies between partners within every Institute, and between Institutes,
 - interdisciplinary topics within the NoE,
 - future collaboration activities.
- Workshop schedule
 - Workshop 2004: Future Generation Grids
 - 1.-5.November 2004, Dagstuhl/Germany
 - 45 invited participants, about 40 from CoreGRID
 - Selected papers after reviewing --> second book in the CoreGRID Series by Springer-Verlag
 - Workshop 2005: To present and discuss the results of integration in Year 1 (held 28-30.11.05 in Pisa)
 - Workshop 2006: planned for October 2006

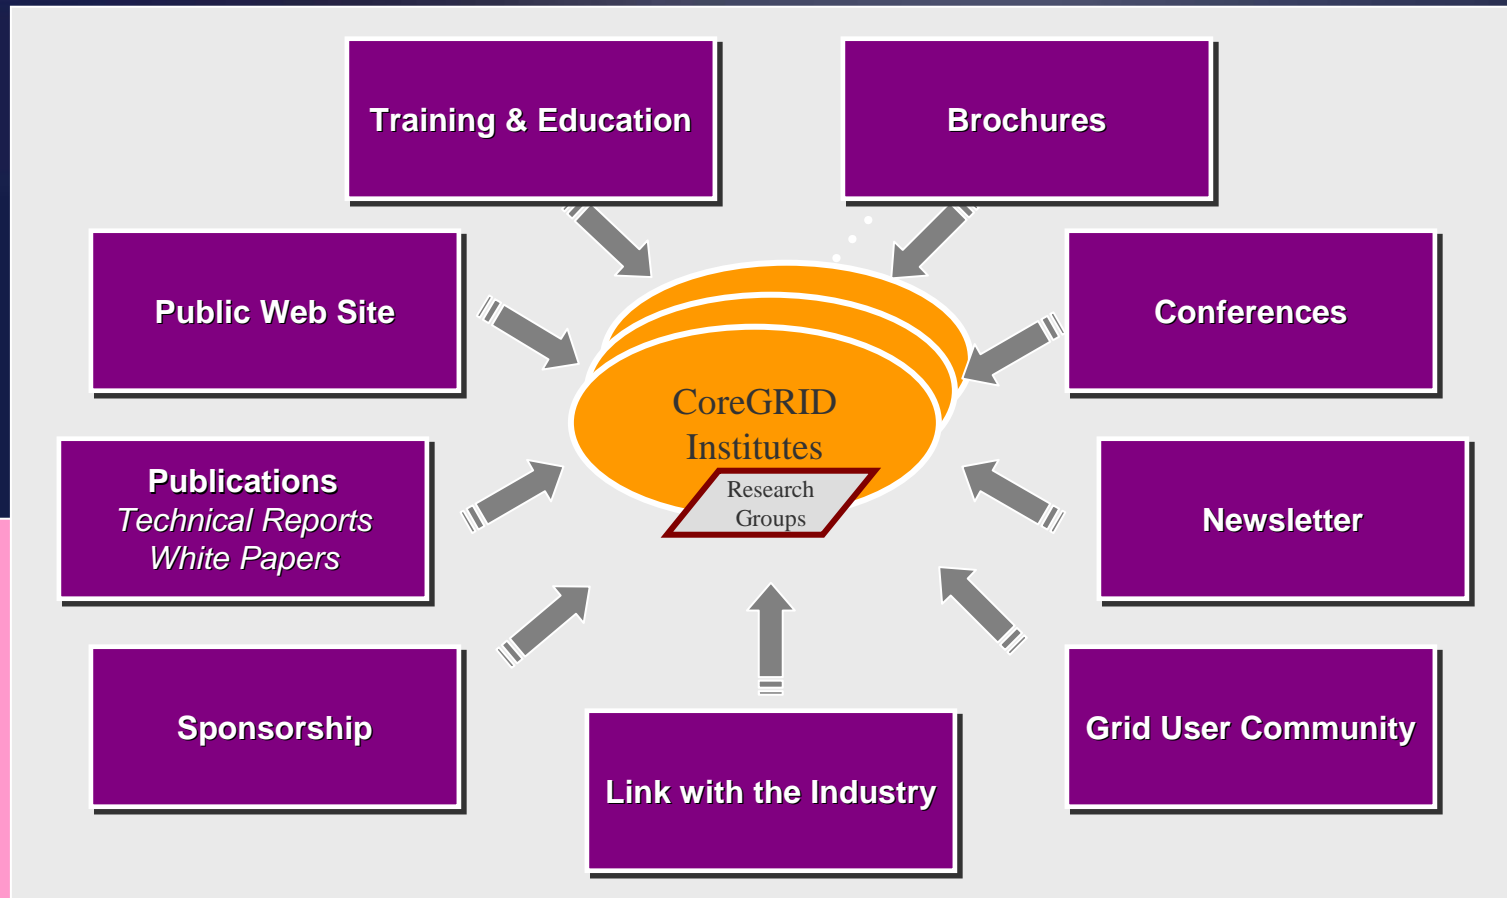

A set of services to foster Integration
