

STREAMS Resynchronization Scenarios and Tests

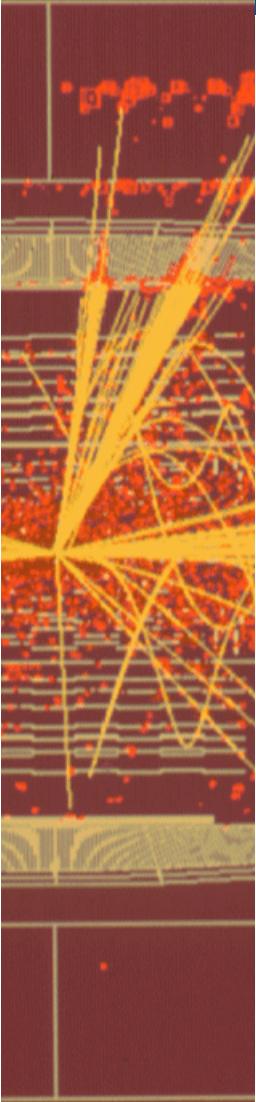

LCG 3D workshop @ CERN
September 2006

Eva Dafonte Perez (CERN)
Gordon Brown (RAL)

- Streams environment preparation:
 - Script written in python
 - Based on condition data
 - Insert only workload

Recovery on destination (I)

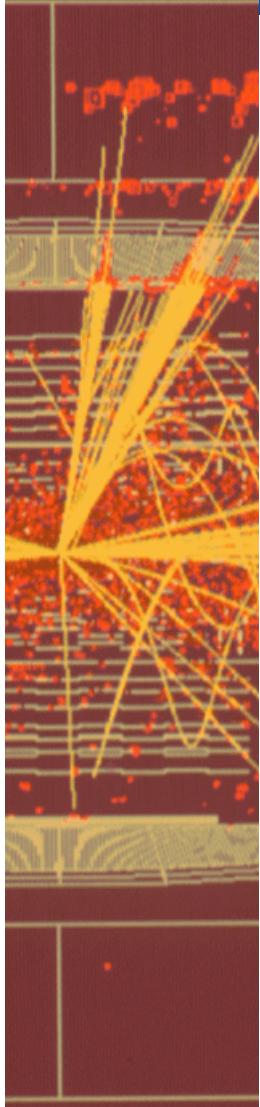

- Scenarios:
 - Point-in-time recovery on the destination database
 - Tier1 database crashes and all data are lost

```
# Dropped the table and recorded the time
SQL> SET TIME ON
09:40:12 SQL> DROP TABLE streams_throughput.apl10;
```

```
# Stopped the database
09:40:18 SQL> shutdown immediate;

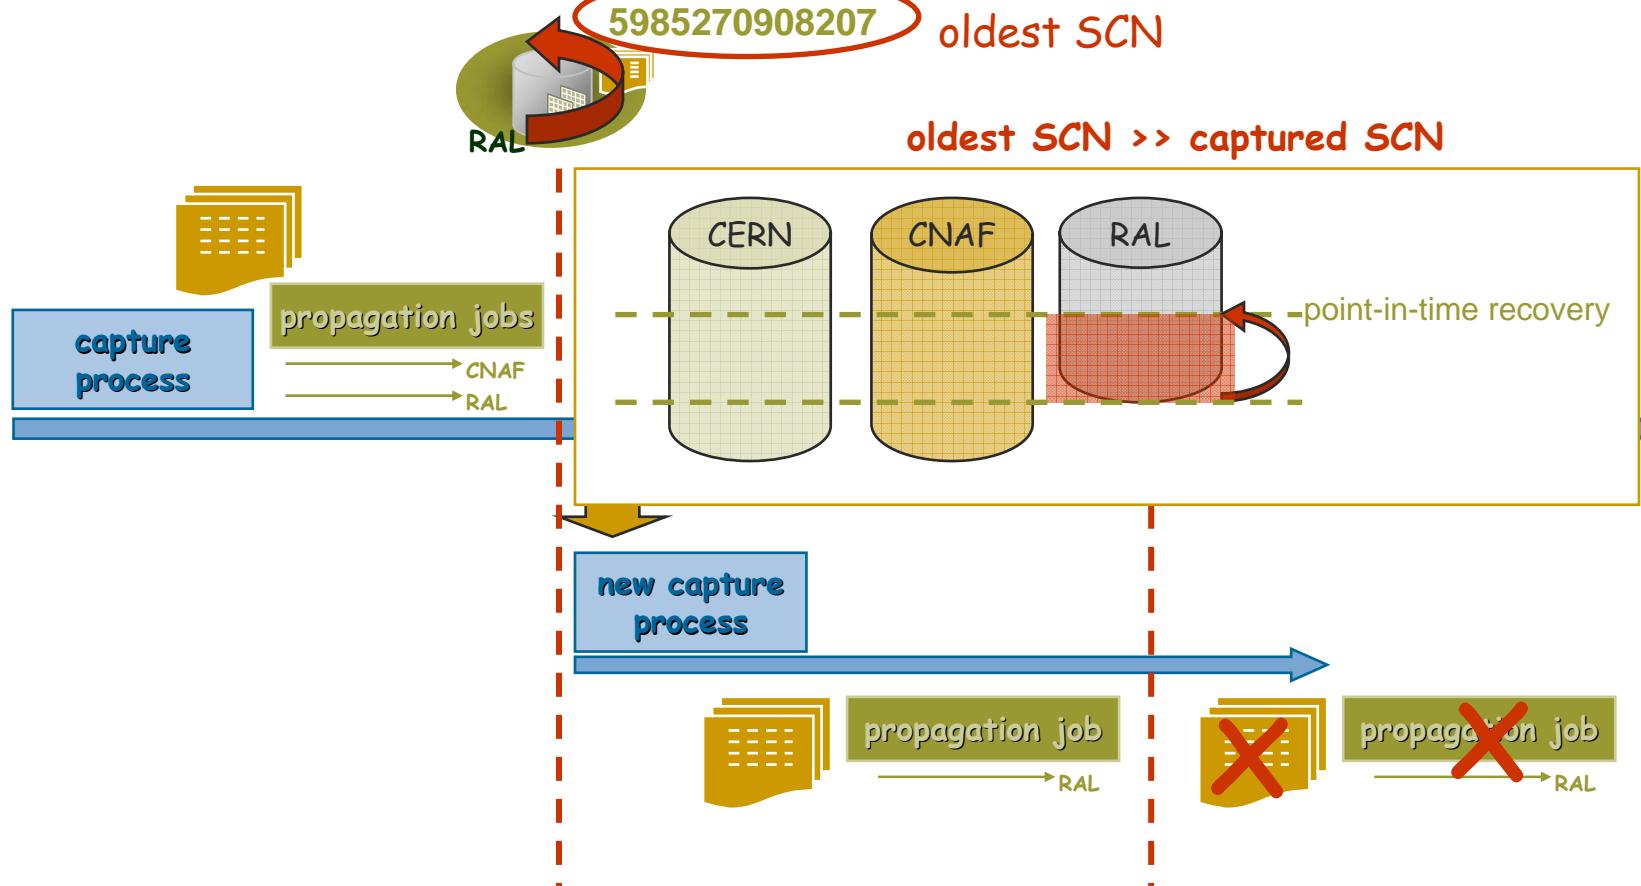

# Connected to RMAN, recovery catalogue and target database
RMAN> RESTORE DATABASE UNTIL TIME "TO_DATE('30-AUG-2006 09:30','DD-MON-YYYY HH24:MI')";
RMAN> RECOVER DATABASE UNTIL TIME "TO_DATE('30-AUG-2006 09:30','DD-MON-YYYY HH24:MI')";

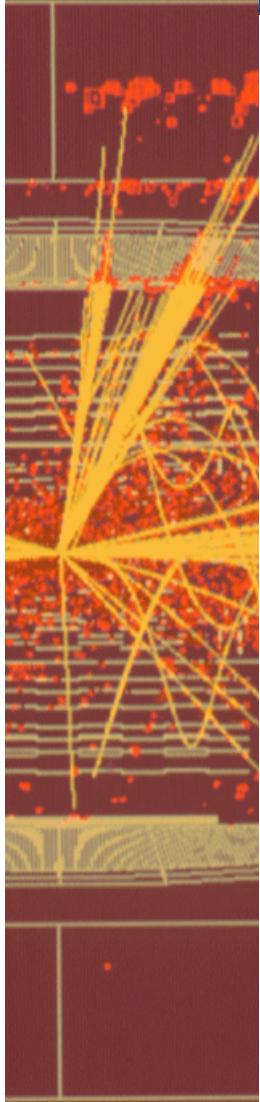

# Restart database to make sure OK
```

Recovery on destination (II)

select oldest_message_number from dba_apply_progress:
5985270908207 **oldest SCN**

Recovery on source (I)

- Scenario:
 - Point-in-time recovery on the source database

```
# Dropped the table and recorded the time
SQL> SET TIME ON;
10:38:02 SQL> drop table STREAMS_THROUGHPUT.test;

# New transactions
```

```
# Stopped the database

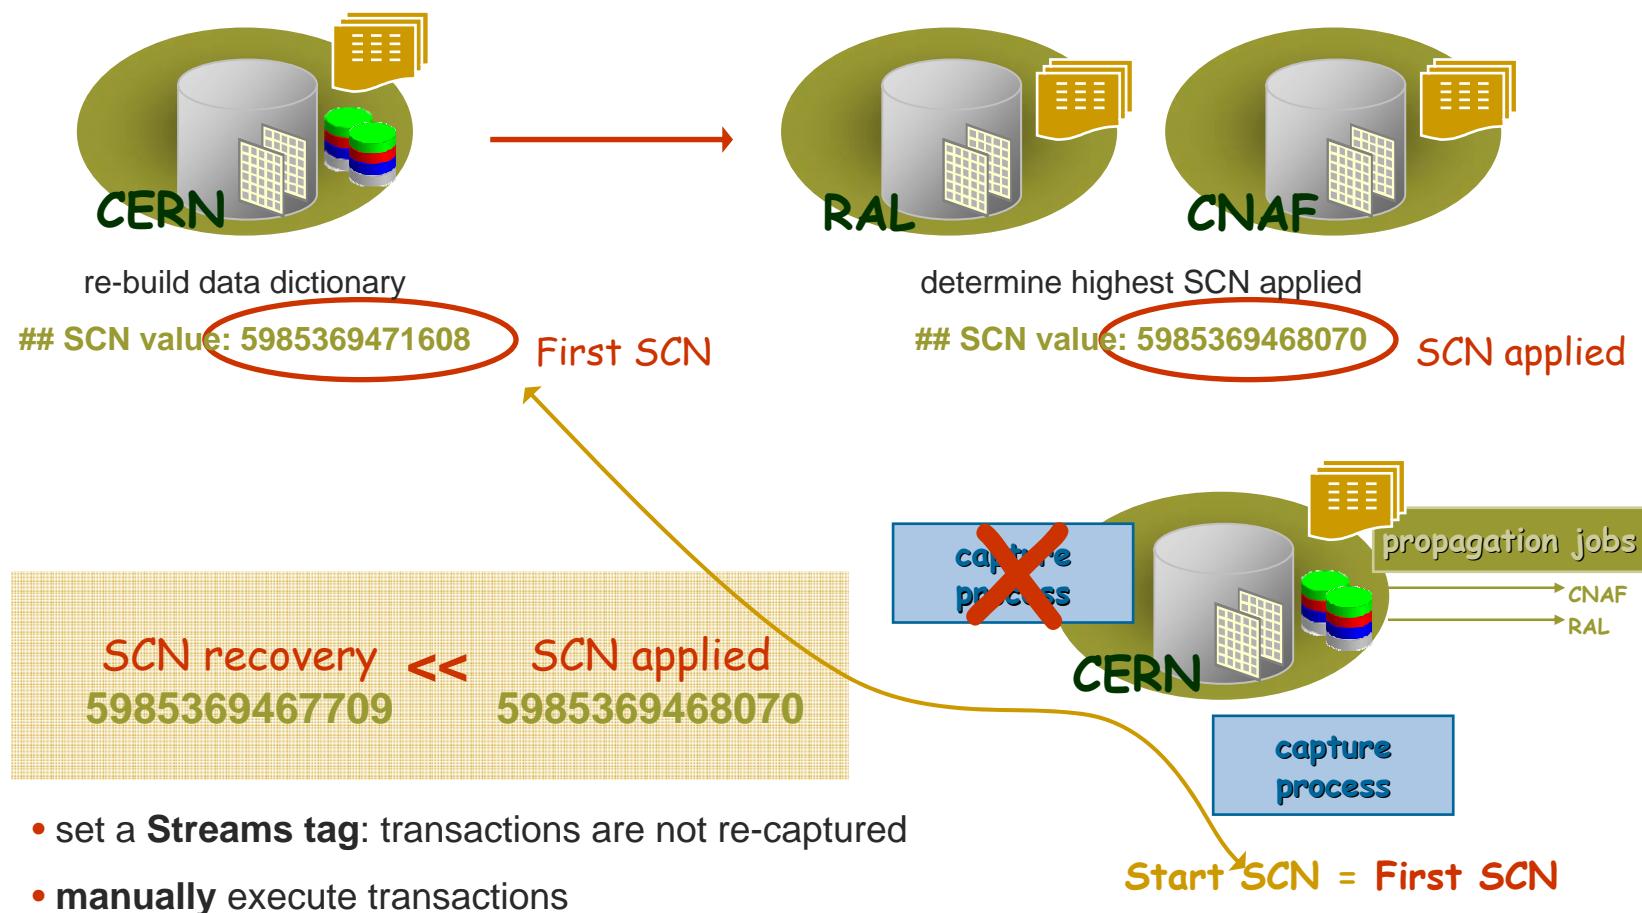

# Connected to RMAN, recovery catalogue and target database
RMAN> RESTORE DATABASE UNTIL TIME "TO_DATE('06-SEP-2006 10:37:55','DD-MON-YYYY HH24:MI:SS')";
RMAN> RECOVER DATABASE UNTIL TIME "TO_DATE('06-SEP-2006 10:37:55','DD-MON-YYYYHH24:MI:SS')";

## Incomplete Recovery applied until change 5985369467709
```

SCN recovery

```
# Restart database to make sure OK – restricted mode
```

Recovery on source (II)

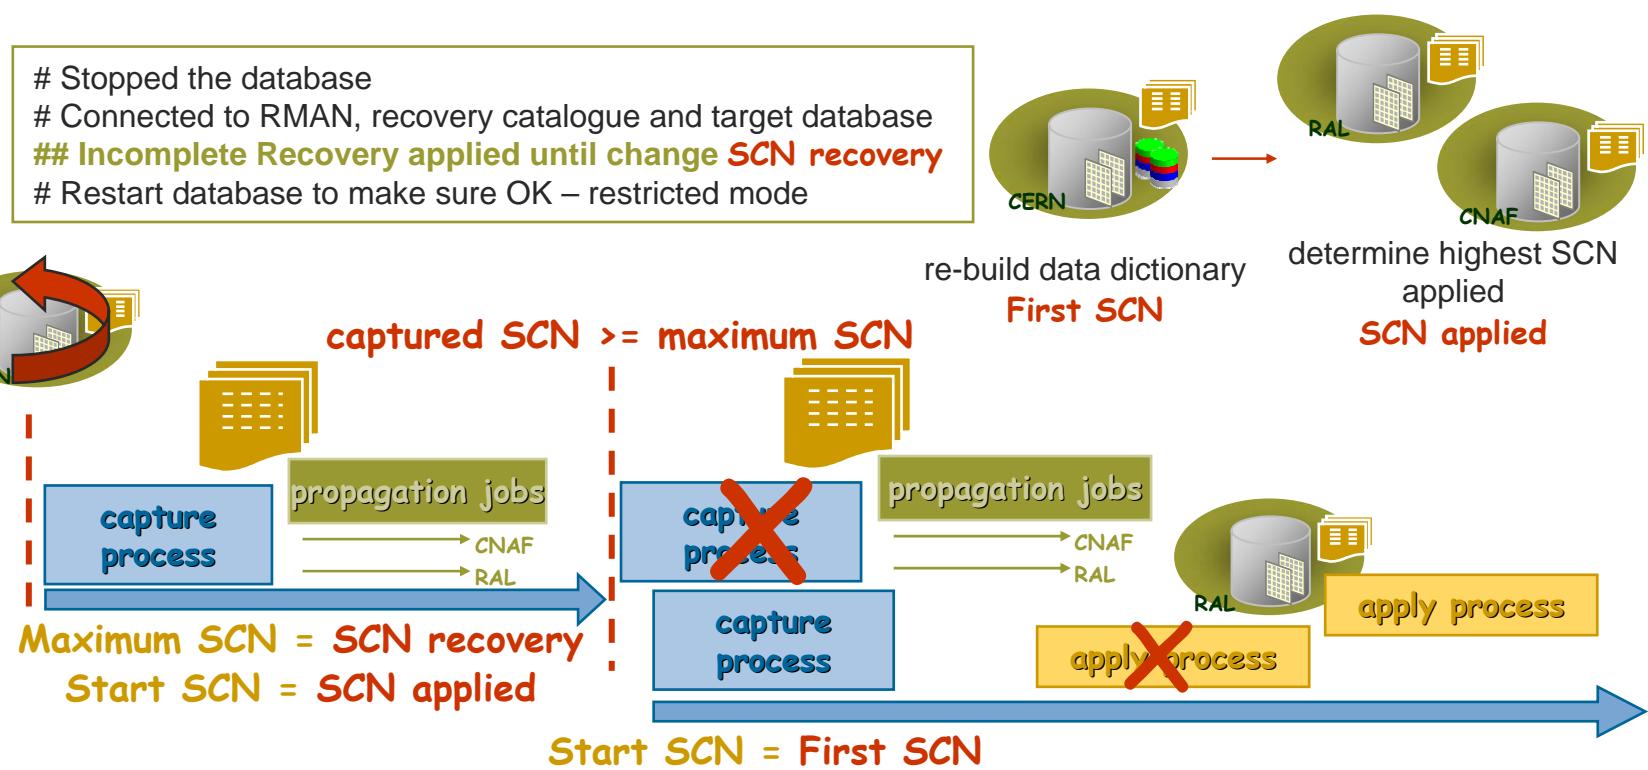

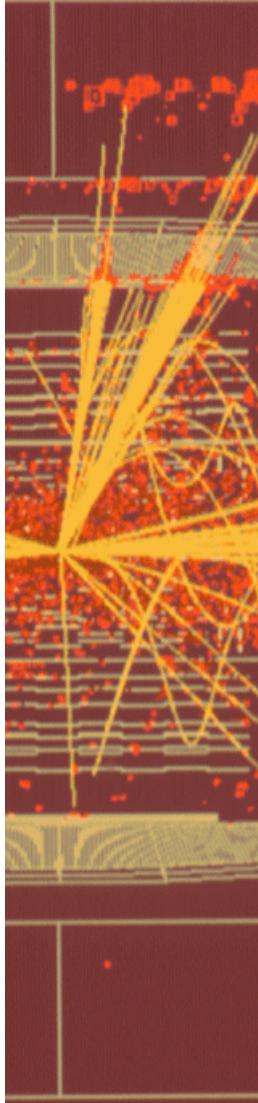

Recovery on source (III) - proposal

- Simulate SCN recovery >> SCN applied

```
# Stopped the database
# Connected to RMAN, recovery catalogue and target database
## Incomplete Recovery applied until change SCN recovery
# Restart database to make sure OK – restricted mode
```

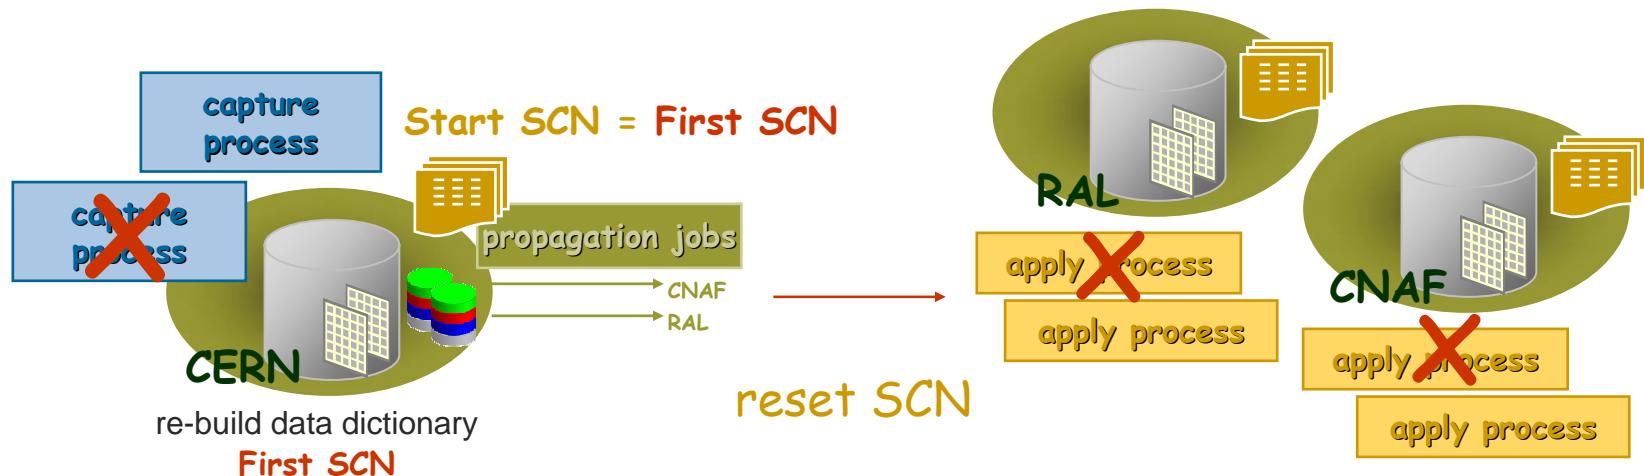

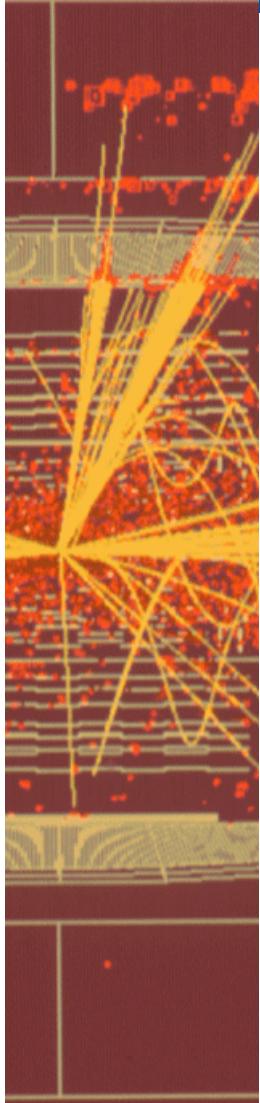

Recovery on source and destinations

- Scenario:
 - Point-in-time recovery on the source and on the destination databases

```
# Stopped the database
# Connected to RMAN, recovery catalogue and target database
## Incomplete Recovery applied until Point-in-Time
# Restart database to make sure OK
```
