Data services on the NGS

Policy for re-use

- This presentation can be re-used for academic purposes.
- However if you do so then please let <u>training-support@nesc.ac.uk</u> know. We need to gather statistics of re-use: no. of events, number of people trained. Thank you!!

Overview

• OGSA-DAI: data access and integration

• GridFTP: a protocol for large file transfer

• The Storage Resource Broker

• And also: ORACLE – available for data storage

Oracle and the NGS

- The NGS core nodes, from the outset, have been partitioned into compute and data clusters.
- As the NGS matures the requirement for data hosting will grow
- Oracle database: for both users and services offered by the NGS.

The NGS Oracle service is ready to host data for your project!

- The RAL and Manchester sites are designated as the data clusters with each site having the ability to dedicate up to eight nodes for use by Oracle.
- Additional application needed after joining the NGS

Data services on NGS

Simple data files

- Middleware supporting
 - Replica files
 - Logical filenames
 - Catalogue: maps logical name to physical storage device/file
 - Virtual filesystems,
 POSIX-like I/O
- Storage Resource Broker

Structured data

- RDBMS, XML databases
- Require <u>extendable</u> middleware tools to support
 - Move computation near to data
 - easy access, controlled by AA
 - integration and federation
- OGSA -DAI
