EGEE Enabling Grids for E-science **The Global Grid Forum**

- Meets 2-3 times per year
- Standardising body – similar to IETF
- Heart of the action
- **Abundance of standards, initiatives, workshops ...**

Prof. Malcolm Atkinson at a GGF in Toronto

School @ chep06

INFSO-RI-508833 Standardising Bodies, Initiatives, Middlewares February 11, 2006 **F** 2

EGEE Enabling Grids for E-science **What other Grid initiatives do exist ?**

- Globus
- Unicore
- AliEn
- Grid-3
- SimDat, Akogrimo, NextGrid, CoreGrid, ...
- CrossGrid
- UK E-Science, D-Grid, Business Grid Computing Project (Japan)
- Geant, TeraGrid, ...
- Oracle 10g, Sun Grid Engine, Discovery Link (IBM)
- ...

to name but a few ...

School @ chep06

EGEE Enabling Grids for E-science **Unicore**

- Started at super computer centers in Germany in 1997
- Java based
- widely used, batch-submission like
- Uses portal -> ease of use
- Industry contribution (Sun, IBM, HP, ...)
- See <http://www.unicore.org>

EGEE AliEn-1/2
Enabling Grids for E-science

- **Pure Open Source project**, started as part of ALICE collaboration (CERN)
- Small development team (very different from EDG)
- Pragmatic approach (what do we have, how can we make it work)
- 3 Million lines of code (cmp. Linux kernel: ca. 5.5 Mio LOC)
- 99 % of the code taken from publicly available packages, mostly **Perl**
- **Only about 1 % of the code had to be developed in addition**
- Similar functionality to EDG framework
- **Based on WebServices (SOAP, XML)**
- Used in other projects, e.g. MammoGrid (UK), a breast cancer database
- See <http://alien.cern.ch>
- **Now continued as AliEn-2**
- See http://gks05.fzk.de/upload/lectures/Peters_alien.pdf for complete explanation!

AliEn @GRID

EGEE Grid-3
Enabling Grids for E-science

- US counterpart to EDG / EGEE
- Deployment of an international Data Grid with dozens of sites and thousands of processors.
- Operated jointly by the U.S. Grid projects iVDGL, GriPhyN and PPDG, and the U.S. participants in the LHC experiments ATLAS and CMS.

INFISO-RI-508833 Standardising Bodies, Initiatives, Middlewares February 11, 2006 **F** 6

EGEE SimDat, Akogrimo, NextGrid, ...
Enabling Grids for E-science

In the summer of 2004 a total the European Commission launched 12 research projects in the context of FP6 in the area of Grid technologies (see press release) that will receive EUR 52 million of EU funding. The bulk of the EU funding is going to 4 projects - SIMDAT, NextGRID, Akogrimo and CoreGRID with 9 Mio. Euro each.

- **NextGRID**: Architecture for Next Generation Grids
- **SimDat**: Industry focus; development of fundamental Grid techniques
- **Akogrimo**: Access to Knowledge through the Grid in a mobile world; "pervasiveness of Grid computing"
- **CoreGrid**: aims at strengthening and advancing scientific and technological excellence
- DataMiningGrid, GridCoord, HPC4U, K-WF Grid, OntoGrid, Provenance, UniGrids

INFISO-RI-508833 Standardising Bodies, Initiatives, Middlewares February 11, 2006 **F** 7

EGEE CrossGrid, Condor, Condor-G, NIMROD
Enabling Grids for E-science

- **CrossGrid**: Interactive use of the Grid (MPI, etc.)
- Builds on EDG
- Project was finished this month
- **CrossGrid-2 (approved)**
- **Condor**: Batch submission. Condor-G: Globus-enabled
- **NIMROD**: Parametric optimisation studies across a Grid

INFISO-RI-508833 Standardising Bodies, Initiatives, Middlewares February 11, 2006 **F** 8

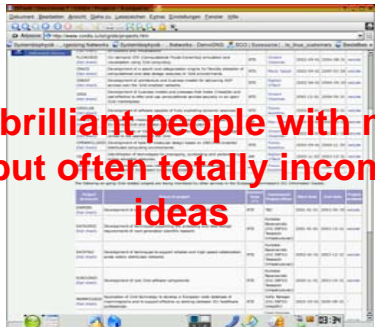

EGEE UK E-Science, Business Grid, Geant, TeraGrid
Enabling Grids for E-scienceE

- National Grid deployment projects (D-Grid, E-Science, Business Grid)
- Focus on integration and production quality infrastructure, mostly not Grid research
- Large funding
- Industry involvement
- TeraGrid, Geant: network infrastructure (our backbone)

INFSO-RI-508833 Standardising Bodies, Initiatives, Middlewares February 11, 2006 9

EGEE Grid Projects
Enabling Grids for E-scienceE

<http://www.cordis.lu/ist/grids/projects.htm>

Many brilliant people with many brilliant (but often totally incompatible) ideas

INFSO-RI-508833 Standardising Bodies, Initiatives, Middlewares February 11, 2006 1

EGEE EGEE: Bringing it all together
Enabling Grids for E-scienceE

Enabling Grids for E-Science

- Objectives
 - consistent, robust and secure service grid infrastructure
 - improving and maintaining the middleware as a best-of-breed system
 - attracting new resources and users from industry as well as science
- Structure
 - 71 leading institutions in 27 countries, federated in regional Grids
 - leveraging national and regional grid activities worldwide
 - funded by the EU with ~32 M Euros for first 2 years starting 1st April 2004
 - Will be continued as EGEE-II as of 04/2006

INFSO-RI-508833 Standardising Bodies, Initiatives, Middlewares February 11, 2006 1

EGEE EGEE activities
Enabling Grids for E-scienceE

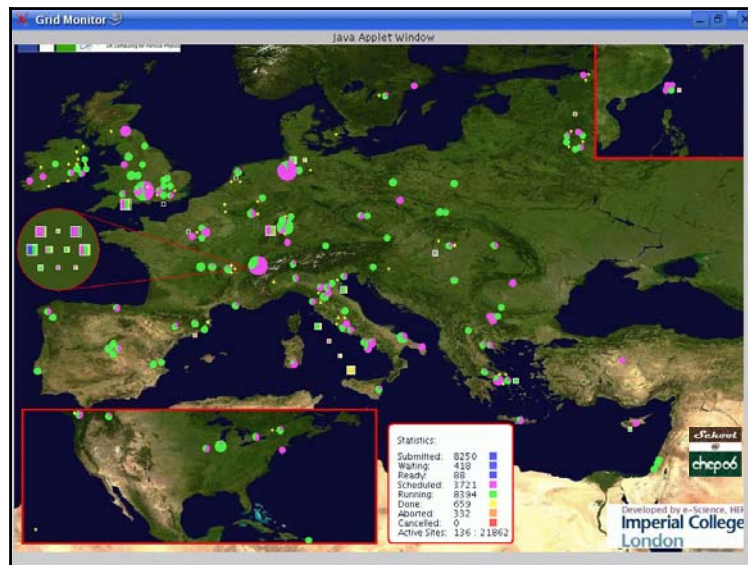

32 Million Euros EU funding over 2 years, started 1st April 2004

- 48 % service activities (Grid Operations, Support and Management, Network Resource Provision)
- 24 % middleware re-engineering (Quality Assurance, Security, Network Services Development)
- 28 % networking (Management, Dissemination and Outreach, User Training and Education, Application Identification and Support, Policy and International Cooperation)

Emphasis in EGEE is on operating a production grid and supporting the end-users

INFSO-RI-508833 Standardising Bodies, Initiatives, Middlewares February 11, 2006 1

egEE Enabling Grids for E-science

Issues and Problems with "The Grid"

- Hardware / Software issues
 - Heterogeneous hardware, software, OS are a BIG problems !
 - Example: User Interface
 - Example: floating point accuracy
 - Example: dynamic libraries
 - Example: distributed application across different platforms
 - Revival of the interpreter, JIT ?
 - Security and accounting – IntraGrid vs. InterGrid
 - Submission times ???
- Political Issues
 - Different communities – different agendas / hidden agendas
 - coordination between partners
 - typical problems of large, heterogeneous organisations
 - small and dynamic vs. large and powerful organisations

INFSO-RI-508833 Standardising Bodies, Initiatives, Middlewares February 11, 2006 **E** 1
