

EGI InSPIRE SA3 / WP6 Update

IT-EC project meeting, 21st May

Status; CERN Responsibilities; Budget; People; Next

Status	<p>Starting – significant overhead & many uncoordinated meetings in Amsterdam (“where else”) . DoW & other docs pass via DavidF. Startup blues?</p> <p>Agreed this week to hold AMB meetings every Wednesday at 09:00!</p>
CERN does?	<p>WP leader; task leaders of “Applications” (Ganga/Diane + Dashboards) + Services for LHC VOs. N.B. Lack of ROSCOE funding still not resolved. GETS?</p> <p><u>Explicit D&M</u>: services for HEP (M4) + annual report (M11); <u>implicit D&M</u>: (almost) all</p> <p>Many other “WLCG” functions – e.g. relationship with OSG, USAG replacement, WLCG operations contact to EGI OPS; also EGI TF (+UF?). Full extent not yet known. 💣</p>
Budget	<p>Managed by Dita: understood in EUR & PM (342/341). Detailed plan: constant revision</p> <p>The budget for HUCs was “agreed” to be EUR5M – we got << ½. SA3: 1875/2254KCHF</p> <p>EGI InSPIRE SA3 is not an extension of EGEE NA4. Free-rides are over.</p>
People	<p>CERN people: Jamie, Maria, Julia, Massimo</p> <p>EU funded: 3 FELL + DOCT from current round; 3 LDs + 6PM; remaining FELLs (+INFN)</p>
Next steps	<p>VO services: regular meetings with computing coordinators of LHC experiments to agree priorities and assignments – the “overhead” of e.g. D4 to be understood;</p> <p>More general goals: AMB Wed; TLM June 10 – activity workplans expected on this timescale (not yet started). Preparation for EGI TF starting... (1/2 day for HUCs)</p> <p>Task 2: shared services (~all partners & disciplines); Tasks 3-6: synergies?</p>
